THE CAMPBELL PRESS

VOLUME 32, NUMBER 8 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA — WEDNESDAY, NOV. 14, 1934

Current Comment

I suppose it would only be fitting that I should, along with thousands of other editors in these United States, comment extensively on the many demonstrations which Monday marked the passing of another Armistice day. It is eminently right that the halt of the useless and horrible slaughter which was the World war be commemorated in some manner, but it seems to me that we go about it in the wrong spirit. Instead of brave speeches, martial music, and parades that smack too strongly of the military, would it not be better to spend some time in retrospect, and some way utilize the occasion to instruct our youngsters in the futility, extravagance, and heart-break of war?

It will be remembered that the late war, which started as an imperialistic conflict, ended as a "war to end war." Well, you can see for yourself that it hasn't worked so well. Europe is a seething, suspicious mass, armed to the teeth, and waiting hopefully for somebody to start something. England alone has apparently had her belly full of war, and will probably attempt to sidestep all the trouble she can. The United States, far from the scene of activity, imagines herself secure enough—and her powder barons are doing all they can to precipitate trouble not only in the Balkans, but in Latin and South America as well.

If we could miraculously do away with greed, the natural lethargy of the human race, if nothing else, would put a halt to war.

A recent development which will, if properly utilized, save many lives, is the sodium vapor lamp for highway lighting. The first installation of this type of lamp has been made at the McConnell subway on the Stockton-Sacramento highway where it is meeting with the approval of night-time motorists. The new lamp employs no filament, but creates a soft yellow glow by the passage of electricity through a vapor of sodium. In New York state, where sodium lamps were tried out on a half mile stretch of busy highway for a period of eight months, records reveal that not one accident occurred on this stretch during that time, and that motorists were loud in their praise of the sodium vapor lamps. It has been observed that headlights are unnecessary on a highway lighted in this manner, and that ordinary hazards, such as pedestrians, cyclists, wet spots on the pavement, etc., show up more distinctly than they do under the conventional type of lamp. It would be an humanitarian measure to so equip all our major highways.

If you have an annual income of $2,080 or less, how much of it goes for taxes?

There's a good chance that you will say "none," inasmuch as your income is below the level reached by the income tax, you discount the sales tax as negligible, and you may have little or no property on which taxes must be paid.

But according to an article by Royal F. Munger, your taxes come to some $480 a year. One hundred and twenty dollars of this represents taxes included in your rent—the landlord pays them and passes the cost on to you. Ninety-six dollars is included in the price of your family's food—the farmer, the processor, the distributor and retailer pay them, and they become part of the cost of everything in the grocery store. Twenty-four dollars is included in the clothing, furniture and similar items you and your dependents purchase—here again, manufacturers, middlemen and retailers are all heavily taxed, and pass their taxes on to the public.

This totals $240. Finally, says Mr. Munger, other indirect tax burdens that affect the cost of living are estimated to take $240 more out of your family's $2,080 annual income. On a percentage basis, as a result, you pay almost 20 per cent of all you earn to government.

Too many people have accepted the fanciful theory that the rich pay all the taxes while the rest of us get the benefits for nothing.

CHEST DRIVE PROCEEDS IN QUIET MIEN

With very little blowing of trumpets or other theatricals the local Community Chest campaign for funds is proceeding quite satisfactorily so far, according to William Lloyd, manager. By the end of the week definite information will be available, he said, as the drive will be officially over on the 16th.

Solicitation is being directed in Cambrian district by the home and school club, in Moreland district by Ed Wiesendanger, San Tomas, Wilbur Mitchell; Hamilton, W. R. Coupland, and in Meridian district by the Campbell Country Woman's club.

SERVICES FOR T. E. NICHOLS HELD SUNDAY

Funeral services were held at the Amos Williams parlors in San Jose Sunday for Thornton E. Nichols, 34, a son of Dr. H. A. Nichols of Superior, Ariz., who passed away Friday morning at the home of his wife's parents, Mr. and Mrs. George E. Griffin of Campbell. Interment took place in Arizona.

Mr. Nichols, who had been ill for some time, came to Campbell this summer from Ventura and Sacramento. He was accompanied by his wife, Mrs. Gladys Nichols. Others who survive him are his brothers and sisters, H. A. Nichols, Jr., Gayle H. Nichols, Mrs. Oliver Coles and Miss Enid Nichols, all of Arizona.

Depression On The Run, "Caf" Fioures Reveal

That times are better in the Campbell community is indicated by records of the grammar school cafeteria, according to Miss Rowena Farman, manager of the school "eating department." The conclusion is based on a comparative table of receipts for the years 1927-34, a specified period in each year showing, for 1927, $504; '28 and '29 showed some gain over that figure. In 1930 receipts began to dwindle, and at the height of the depression in 1932 figures show but $386. Last year was the same, but this year receipts have achieved$443 for the same period.

Some idea of the number of lunches this figure represents may be drawn from the fact that the average cafeteria lunch costs but ten cents.

Night Watch Ins. Fund Still Short

With the Campbell chamber of commerce's night-watch insurance fund still considerably short of the necessary $75, chamber officials this week stated that the balance would be raised by solocitation. This year people had been asked to turn their contributions in to Dan Yeager, secretary of the organization, but the response indicates that more thorough methods will have to be employed.

Insurance on the nightwatchman is a vital factor in the maintenance of police by the chamber of commerce, inasmuch as the chamber, operating its police without insurance, becomes liable for any damage inflicted by the officer in line of duty.

Hereafter, said Yeager, a small sum will be w ithheld from the officer's monthly salary in order to assure his insurance premium.

Harold Townsend, who has been working in Yosemite all summer and fall, visited last week with his parents, Dr. and Mrs. A. B. Townsend of North Union avenue.

Bill Devitt of Boulder, Oakland and parts north and south, visited over the week-end with his father and friends here and in Los Gatos.

Extensive Prune Advt. Campaign To Help Sell Fruit

San Francisco, Nov. 14—The California prune industry advertising campaign being carried on this year under the direction of the United Prune Growers of California will be wider in scope than either of the programs conducted during the past two years, according to Ray Randall, advertising manager of the United.

The present campaign is being built around new discoveries of the health and dietetic values of California prunes made as the result of original research sponsored by the United in a number of American universities during the past 18 months.

A summary of the new facts about California prunes developed from these studies has just been published in pamphlet form following its review and acceptance by the committee on foods of the American Medical association.

This pamphlet has been mailed out by the United to more than 120,000 physicians and to more than 10,000 hospital and institutional dietitians as one of the first steps to be taken in placing this latest scientific information before professional groups and the public at large.

"One of the most important objectives of our prune industry advertising campaign this year," Randall asserted today, "is to place in the hands of doctors and others professionally interested in nutrition the new facts which have been discovered about prunes in the past two years.

"These doctors and food experts advise hundreds of thousands of persons a year on diet matters, and as to what they should and should not eat.

"The new facts which we have found out about prunes show that they can now be included in many diets where formerly they were not permitted, due to erroneous ideas which many doctors held regarding them.

"It is of vital importance to the California prune industry, therefore, that the complete story of the new discoveries about prunes be given to doctors immediately, so that the advice which they give their patients may be based upon the most recent and most accurate information available."

Joint Meeting of CCPT-PTA Held

El Paradiso Council CCPT met with Campbell union grammar school PTA last week. The meeting was presided over by Mrs. Frank Blair, president, and later turned over to Mrs. Dwight Sheffer of Sunnyvale, council president.

After the flag salute, led by Mrs. Ross Page, first vice president of the council, little Jimmie Rambo entertained with several piano selections.

Reports were given by representatives of the council, Mrs. Blair reporting for the Campbell unit in regard to furnishing milk and some lunches to needy children, also on the membership drive being carried on, with 90 members at present.

Mrs. E. E. Cox, president of the Saratoga unit, reported between 50 and 60 members, and that the next council meeting will be at Saratoga on the evening of Jan. 24.

Mrs. R. V. Garrod represented the Los Gatos union high school unit, and reported a membership of about 100, and told of the interesting type of meetings planned for the year.

Mrs. Mike Kirkish reported for Sunnyvale unit, inviting all present to Sunnyvale when the Sixth District meets there for Founders' day program, Feb. 4.

Mrs. Walter Magneson, president of Los aGtos elementary unit, reported well-attended meetings, 50 members at present, work of repairs to the school building progressing nicely, and the good work being done by the school traffic squad, sponsored by this unit.

Dr. E. H. Staffelbach of San Jose State college was introduced by Mrs. C. E. Williams, director of education, and he spoke of the progress education has made, mentioning that Daniel Webster's first speech was made in behalf of public schools. It is interesting to know that since 1930 attendance in high schools has increased and that in California none of the schools have been closed, as has been done in many states.

After this interesting program refreshments were served by mothers of eighth grade pupils.

The Rev. and Mrs. Edwin Bowling of the Methodist church have returned from an extensive vacation in Illinois where they visited their parents and took in the exposition.

Early Valley Romance to be Broadcast Here

Santa Clara valley swings into action with a series of radio dramas, "Days of Old Romance in Santa Clara Valley," to be presented every Monday evening from 8:15 to 8:45 over station KQW.

Sponsored by the San Jose junior chamber of commerce, the plays will be written by the Santa Clara county branch, League of American Pen Women under the direction of Gertrude B. Murphy, radio chairman. They will be produced under the direction of Hal MacChesney of the Radio Drama league. Alma Lowrie Williams of San Jose State college is in charge of incidental music, which will be of authentic early California composition.

The series will depict in dramatic form the highlights of early Santa Clara valley history. The opening program, written by Lutheria Cunningham of Saratoga, brings the story of de Anza and the long hazardous trip from Mexico to San Francisco, featuring especially the naming of Montana de las Lagrimas, or Hills of Tears, just south of San Jose.

Future programs will deal with the founding of Mission Santa Clara, early pueblo days, a dramatic incident in the history of Mission San Jose, the meeting of the first legislature in San Jose, romantic tales of Gilroy, Almaden, Alviso, and picturesque incidents in the development of Santa Clara valley.

The series opened Monday, Nov. 12, and programs will be presented every Monday evening thereafter.

Williams Thanks Supporters

I wish to express my grateful appreciation to the many loyal friends who worked so devotedly for my re-election.

Amos O. Williams

Dr. and Mrs. G. B. Huste of Modesto spent the week-end with relatives in Campbell and Palo Alto. Sunday about 30 members of the Hyde-Husted families gathered at the Ralph Hyde home to greet the doctor and his wife.

EMPLOYMENT BUREAU FOR C.U.H.S. GIRLS

The next time you, Mrs. Campbell Housewife, helplessly survey the wreckage of your kitchen after entertaining, don't give up the ship; phone Campbell 14-W and get a girl to help you for an hour or two. When unexpected company is bearing down upon a somewhat disorganized house, get a girl to help you for a while. When you need extra help for a big party, or want somebody to serve at a holiday dinner, don't forget that there are many capable girls available through the girls' employment bureau at Campbell high school.

That is the thought Mrs. Lillian Rae, dean of girls, would like to get across to the good people of Campbell. There is always a girl or two available throughout the school day, she says, and Saturdays, Sundays and evenings there are always a number of girls who would be glad of the chance to take care of "Junior," help with the housework, iron, fix up for your party, etc.

"We have many types of girls to choose from," said Mrs. Rae. "They are pleased to work for 25 cents an hour, and are usually well worth it. Many of them need desperately an opportunity to make a little extra money to help defray their school expenses, purchase clothes, and the like. In order to help them we have organized an employment bureau, and the patronage of the women of Campbell and vicinity will be deeply appreciated not only by the girls, but by myself as well.' '

H. S. Play Cast, Plot Reviewed

"Captain Applejack," the 1934 senior play which will be presented in the grammar school auditorium on the evening of Nov. 23 is a three-act comedy drama. It is concerned with the romantic experiences of Ambrose Applejohn, the descendant of a pirate. Ambrose reverts to type and lives up to his piratical ancestor's reputation. Not only does he repel pirates on board his own vessel, but is forced to fight off a band of crooks who invade his home seeking treasures supposed to be buried within its walls.

The cast of characters is headed by Dennis Bennett as Ambrose Applejohn. Others are Marie Vierra as Madame Valeska, Mildred Bowling as Poppy Faire, Frances Chesney as Mrs. Whotsombe, Norma Vannucci as Mrs. Pengard, Madeline Byrnes as Palmer, John Talia as Boralsky, Teddy Cutting as Mr. Pengard, Arthur Heinsen as the butler, Bob Burrow as Dennett.

In addition the cast includes a mob of cut-throat villains played by other members of the Senior class.

Some good seats are still available for this interesting production, and those who intend to witness the show should make their reservations soon.

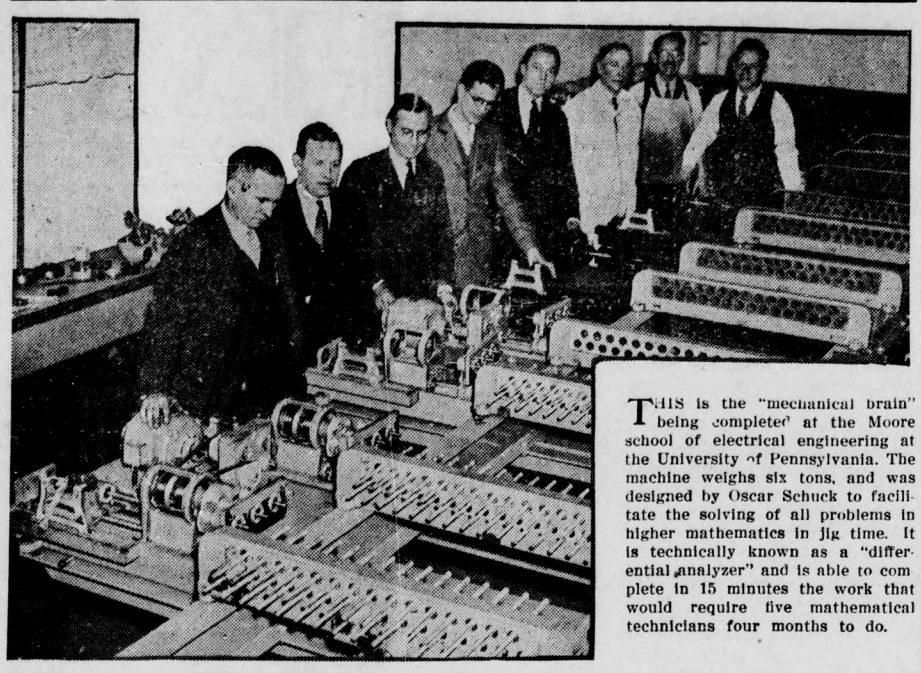
Cambrian Women Feted At Party

The birthdays of 12 members whose natal days ocur between July 1 and Nov. 6 ofefred a motif for a recent meeting of the Cambrian Home and School club, at which Mrs. Rose Hanger was hostess.

A cake, decked with candles, and pink and white decorations added their bit to the festive occasion, and each lady whose birthday was being observed received a beautiful corsage.

At this meeting it was decided to cooperate with Cambrian school children at their bazaar Dec. 13, the purpose of which is to raise money for a proposed manual training room. The Mesdames Ann Bernardasci, Eleanor Nelson and G. W. Bunda were appointed by President Mrs. Maynard Knopf to aid in preparations for the bazaar.

"Mechanical Brain" That Solves Problems



THIS is the "mechanical brain" being completed at the Moore school of electrical engineering at the University of Pennsylvania. The machine weighs six tons, and was designed by Oscar Schuck to facilitate the solving of all problems in higher mathematics in jig time. It is technically known as a "differential analyzer" and is able to complete in 15 minutes the work that would require five mathematical technicians four months to do.

QUESTION BOX

by ED WYNN, *The Perfect Fool*

Dear Mr. Wynn:
I have been married little over a year. My mother is coming to live with us. My husband says the only way he will let his mother-in-law live with us is for us to buy a folding bed for her to sleep in. Can you tell me why he insists on a folding bed? Yours truly,
I. M. FRANTIC.

Answer: He figures if his mother-in-law sleeps in a folding bed he will be able to shut her up whenever he wants to.

Dear Mr. Wynn:
Kindly advise in detail what is meant by a diplomat.
Truly yours
CON. GRESSMAN.

Answer: A "diplomat" is a man who always remembers his wife's birthday and at the same time forgets her age.

Dear Mr. Wynn:
I read in the paper that a man fell from the roof of a ten-story building, into a wagon filled with soda water bottles. The newspaper claimed the man was not hurt. If this is true how do you account for it? Truly yours,
I. DOUTIT.

Answer: That could happen, especially so if the soda water bottles were filled. In this particular case the man wasn't hurt because he fell into a wagon full of soft drinks.

Dear Mr. Wynn:
I am sure I met the meanest man in the world. This man, as soon as the cold weather comes around, goes down to the railroad tracks and calls out all sorts of vile names at the engineers as they pass in their engines. It seems the engineers get angry, but they can't stop their engines, so they throw pieces of coal at him, trying, of course, to hit him. That's just what this man wants. He has a bag with him and as the engineers throw the coal at him he picks it up and takes it home for his furnace. Did you ever hear of anyone meaner than that?
Truly yours,
I. GOSSIP.

Answer: That's pretty stingy; but I knew a man once who was so stingy it is unbelievable. He wanted to commit suicide and he went next door to use his neighbor's gas.

BEDTIME STORY

By THORNTON W. BURGESS

A LESSON IN POLITENESS

A FLOCK of modestly dressed yet rather distinguished looking feathered folks alighted in a cherry tree and began helping themselves to Farmer Brown's cherries. They were about the size of Winsome Bluebird, but did not look in the least like him, for they were dressed almost wholly in a beautiful rich, soft, grayish-brown. Across the end of each tail was a bright yellow band. On each, the forehead, chin, and a line through each eye was velvety black. Each wore a very stylish pointed cap, and on the wings of most of them were little spots of red which looked like sealing wax. From this they get the name of Waxwings. They were slim and trim and quite dandified, and in a quiet way were really beautiful.

"If they stay long, Farmer Brown won't have any cherries left," remarked Peter.

"Don't worry," replied Jenny Wren. "I don't know anybody equal to them for roaming about. Here are most of us with families, while those gadabouts haven't even begun thinking about housekeeping yet. They certainly do like those cherries, but I guess Farmer Brown can stand the loss of what they eat. He may have fewer cherries, but he'll have more apples because of them."

"How's that?" demanded Peter.

"Oh," replied Jenny, "they were over here a while ago when those little green canker worms threatened to eat up the whole orchard, and they stuffed themselves on those worms just the same as they are stuffing themselves on cherries now. They are very fond of small fruits, but most of those they eat are the wild kind which are of no use to Farmer Brown or to anybody else. They eat so many cedar berries that some folks call them Cedar Birds. Others call them Cherry Birds. Now just look at that performance, will you!"

They Were About the Size of Winsome Bluebird, but Did Not Look in the Least Like Him.

There were five of the Waxwings, and they were seated side by side on a branch of the cherry tree. One of them had a plump cherry which he passed to the next one. This one passed it on to the next, and so it went to the end of the row and half way back before it was finally eaten. Peter laughed right out. "Never in my life have I seen such politeness," said he.

"Huh!" exclaimed Jenny Wren. "I don't believe it was politeness at all. I guess if you got at the truth of the matter you would find each one was stuffed so full that he thought he didn't have room for that cherry, and so passed it along."

"Well, I think that was politeness just the same," retorted Peter. "The first one might have dropped the cherry instead of passing it along."

Just then the Waxwings flew away.

Causes of Bankruptcy

As analyzed in studies by Bradstreet's, business failures may be assigned to the following causes in order of importance: Lack of capital, incompetence, specific conditions, fraud, inexperience, competition, neglect, unwise credits, failure of others' extravagance and speculation.

Do You Know—

That the first engagement token was the Gimmal ring, this name being derived from the Latin Gemmellus, which means joined. The ring was made of two separate bands, with little teeth cut in their inner edge, and were joined together by the bride and groom when they walked to the altar.

Huckleberry Pie

By ANNE CAMPBELL

IT'S just a huckleberry pie
Set on the window ledge to cool.
Outside the summer sun is high,
The sky a blue inverted pool.
And once again a barefoot child
Sets out to find, tin pail in hand,
The berries hiding in the wild
Far off upon that pleasant land.

It was in huckleberry time
The farm was loveliest to see . . .
I saw the morning-glories climb
Upon my window happily;
And glancing backward, as I walked
With cheerful footsteps down the lane,
It seemed to me the brown wrens mocked
That little girl so tanned and plain.

But nothing changed that sense of peace
That was my heart's blest quality.
The woodland path was a release
From irksome household tasks to me.
But now upon small things intent,
I view with an approving eye
The sweetness of home's sacrament,
Caught in a huckleberry pie.

THROUGH A Woman's Eyes

By JEAN NEWTON

DOING NOTHING USEFUL!

"I HAD two hundred letters waiting, a few days ago, and I deliberately went out for the afternoon and spent two hours reading poetry. This was entirely outside my schedule, and you will probably raise your hands in horror at the thought of breaking up a well-budgeted day, but I believe in the end it makes for better quality of work."

Mrs. Franklin D. Roosevelt wrote that not long ago in a message on the necessity of every person occasionally to learn to loaf.

"Sometimes it is extremely good for you to forget that there is anything in the world that needs to be done, and to do some particular thing that you want to do," she remarked. "Every human being needs a certain amount of time in which he can be peaceful. Peace may take the form of exercise, or reading, or any congenial occupation, but one thing which must not be connected with it is a sense of obligation to do some particular thing at some particular time."

That is a message which should be reprinted and sent to every woman, particularly every wife and mother in the country. The man or woman with a job and office hours may work very hard, they may be under great stress and strain, but usually, when they shut the door of the office behind them they know that time of peace which is indeed necessary to every human being—that time when there is nothing in particular that they have to do. When a man comes home, his time of relaxation begins. And so with the working girl who comes home to her mother, or the bachelor woman who returns to her flat. Usually, the time there has "no strings tied to it."

But the wife and mother! How aptly some one said hers is the clock that has no hands. Take a rainy Sunday. There may be no cards or games, the papers may be read. Then the family will be just "sitting around." But mother? Oh no; that's a chance to catch up on the darning or to start that sweater she wants to knit for little Jane. She doesn't have to fold her hands to rest!

But, doesn't she! If it were not for that darning or knitting on her mind, would she not enjoy occasionally just folding her hands and "sitting around"? I say she may not even know it, but she would. I say that every woman who keeps house should keep some time free for what Mrs. Roosevelt calls a time for being peaceful—a time when she will do nothing that could possibly be called useful!

MOTHER'S COOK BOOK

WHEN ENTERTAINING

A TASTY fritter is always a most dainty dish to set before a guest. Fritters are usually served hot with a hot sauce, although the fruit fritter is often served as a dessert with a sauce appropriate. Here are two fruity ones:

Fruity Fritters.

Beat one egg slightly, add one tablespoon of oil and two-thirds of a cup of milk. Sift one and one fourth cups of pastry flour with one half teaspoon of salt and one tablespoon of sugar and add to the egg mixture. Add slices of pineapple, banana, pear or apple. Fry a golden brown and serve with butterscotch sirup.

Melt butterscotch candy with a little boiling water and serve hot. One may prepare the sirup by using sugar, a bit of molasses, a teaspoon of vinegar and butter, cooked together in any quantity.

Cherry Fritters.

Mix one-fourth of a cup each of corn starch, flour, and one-half cup of sugar with one-fourth teaspoon of salt. Add gradually to two cups of scalded milk with the yolks of three eggs beaten and diluted with one-fourth cup of cold milk. Cook 15 minutes in a double boiler, stirring constantly until thickened. Add one-half cup of maraschino cherries cut into halves, pour into a buttered, shallow tin and cool. Turn on a board, cut into squares or diamonds, dip into flour, egg and crumbs and fry in deep fat. Serve with a sauce made from the cherry sirup.

Chocolate Nut Pudding.

Mix one cup of soft bread crumbs with two cups of scalded milk, one cup of chopped black walnut meats, one-half teaspoon of salt, three-fourths of a cup of sugar and the yolks of two eggs slightly beaten. Cut and fold in the stiffly beaten whites of two eggs and one teaspoon of vanilla. Turn into buttered molds or gem pans and bake in a moderate oven. Serve with a hard sauce.

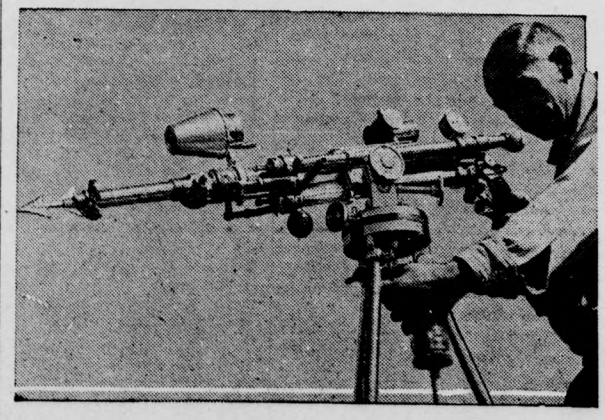
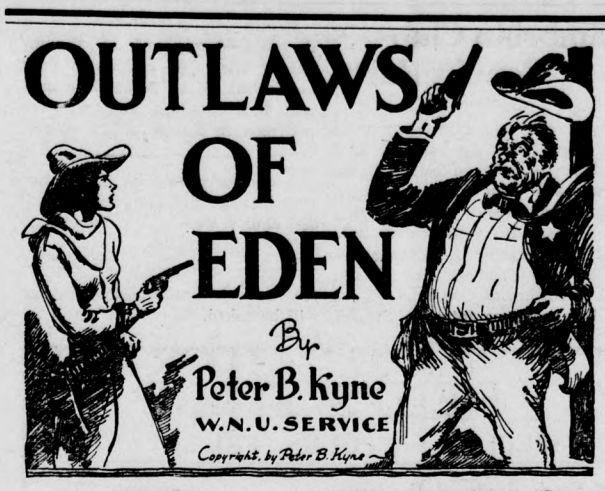
After the Storm

Making It Tough for the Fishes



C. R. KLEIN of Santa Monica, Calif., is here shown with his recently completed harpoon gun which will be used for shooting swordfish, alligators, sharks, etc. The gun can also be used in emergencies by life guard stations for firing life lines to distressed persons and boats. The gun, constructed of steel and bronze, is 30 inches in length and weighs but 20 pounds. It has two hand pumps, one for low and the other for high pressure. The line can be shot 150 yards with 300 pounds pressure. The sight on the gun is similar to an airplane ring sight. The gun also has a rail attachment that can be used instead of a tripod. The tapered cone is used with the line wound on it, this cone keeping the line from tangling when the harpoon is fired. It is equipped with a pistol grip and trigger for firing.

OUTLAWS OF EDEN



By Peter B. Kyne

W.N.U. SERVICE

Copyright, by Peter B. Kyne

SYNOPSIS

At the close of the Mexican war, Robin Kershaw, with his bride, rode into northeastern California. Here he found an ideal valley for ranching and cattle raising. They christened it Eden Valley. Below Eden Valley is a less valuable tract which Kershaw's wife names Forlorn Valley. Joel Hensley settles in the lower half of the valley. There is bad blood over fences and water. Kershaw kills Hensley and the blood-feud is on. By 1917, Rance Kershaw, his son Owen, and daughter Lorry are all that remains of one clan. Nate Tichenor is the sole survivor on the Hensley side. Returning, after an absence of nine years, he goes to help Lorry in her car and finds her father has died of heart disease. Silas Babson controls the Forlorn Valley settlement through his bank. He schemes to control the irrigation and hydro-electric possibilities of Eden Valley. Nate tells Lorry that he and Owen, Lorry's brother, met in France just before Owen was killed, and they became buddies. Babson makes legal application for the allocation of flood waters to the Forlorn Valley irrigation district, which he organizes. With money provided by Nate, Lorry clears up her indebtedness to Babson.

CHAPTER VI—Continued

—6—

"But we will not divert their share of the water, Mr. Gagan. Our plan is to divert only that portion of the flood or waste waters allocated to us by the division of water rights, which is under the control of the state water commission."

"That will be fine, provided you can get away with it," the lawyer replied dryly. "My partners and I have considered this new law very carefully and it is our opinion that it is subject to successful attack, by an energetic and belligerent riparian owner, as unconstitutional."

"It's been on the statute books five years," Babson challenged. "Why hasn't it already been declared unconstitutional?"

"Probably because nobody has pressed the point. Lawyers who could be engaged to tackle such a tough fight are high-priced, and the men who would engage them usually cannot afford them. So the victims make the best of the situation and get along on the amount of water allocated to them by the state water commission."

"Tichenor and the Kershaw girl will not fight us," Babson declared confidently.

"Nevertheless, if they're smart, they'll fight you. From what you tell me, these people come of fighting stock."

"Well, suppose we lose," Babson countered. "The district can still get rid of them by condemning all their lands' water rights and buying them, can't it?"

"Yes, of course. But you'd still have the power company on the creek below you, clamoring for more water than they would then receive."

"Wouldn't the state water commission have to adjudicate the quarrel?"

Again Gagan smiled his enigmatic smile. "I suppose so. Still, with these two riparian owners eliminated by a condemnation suit, the issue would lie between you and the power company and if, as you seem to think, there is water enough for both, a compromise should not be difficult to reach."

"It's a chance I'll have to take," Babson answered doggedly, thinking of the mortgages his bank held on dry-farming lands in Forlorn Valley. Once he succeeded in getting surface irrigation on those lands their values would be stabilized—likewise the value of his bank's capital stock.

Having gorged himself with legal information on every angle of the situation that confronted him, he paid his bill and returned to Valley Center in great good humor. He had boiled the issue down to its essentials. The water would cost nothing save the expense of leading it to Forlorn Valley or, if Nate Tichenor and Lorry Kershaw should oppose him successfully, he would have to buy them out via the condemnation suit process. If his plans matured in advance of those of the power company he suspected of interest in the Eden Valley water, he was safe. If they didn't he would still not be ruined. And once safely out of the unpleasant situation in which he found himself, he cared not a fig should ruin overtake the district subsequently.

The bank was closed for the day when Babson reached Valley Center, so it was not until he sat down at his desk next morning that Mr. Henry Rookby was able to impart to him such news of local interest as had developed during Babson's absence.

"Rance Kershaw's dead," Rookby announced immediately. "Dropped dead of heart disease the day you left for San Francisco."

Babson's face expressed a hypocritical concern. "That's much too bad, Henry," he replied. "I'm sorry about Rance. He was as hard as steel, but honest. You never had to guess where Rance Kershaw stood on any proposition." Secretly he could have given three long, raucous cheers.

"I suppose the girl will have to liquidate now," he continued after a moment's thought. "She can't carry on with that business alone, and the estate is badly embarrassed financially. I'll be hanged if I see, Henry, how this bank is going to carry the Kershaw estate along to take a chance on getting its money back."

"So I thought," Rookby answered. "By the way, Nate Tichenor's come back to Eden Valley."

Babson started as if bee-stung. "Rance Kershaw owed the Bar H a lot of money on chattel mortgage for cattle he bought in 1920. Henry, he must owe the Bar H three or four years' rent."

"Undoubtedly," Mr. Rookby opined.

"Nate Tichenor's let that steer have all the rope he wanted; now that the estate is in so deep it can't climb out, he's come back to give the Kershaw clan the final clout that will finish it."

"I wouldn't be so sure about that, Mr. Babson." And Rookby went on to describe Rance Kershaw's death in front of the gate leading to the Bar H headquarters; the summoning by Lorry Kershaw of Nate Tichenor in that hour of stress; the kindly and neighborly action of Tichenor thereafter; the arrival of Rube Tenney to take over the job of riding boss on the Circle K; the apparent friendliness between Tichenor and Lorry Kershaw, as faithfully reported by Miss Lizzie Bachman to all in Valley Center who would listen to her eager recital.

"Lizzie was only up there with Lorry Kershaw three days and Nate Tichenor gave her fifty dollars for it," Rookby went on. "What's more, he paid her in advance. And he gave Bud Seamon and Jake Bachelier ten dollars each for digging Rance's grave."

"Liberal, ain't he?" Babson commented. "Henry, this is the most h—l cracking piece of news that's come out of Eden Valley since Taylor Hensley and Rance Kershaw had their ruckus. Just the same, I'm banking Nate Tichenor's no softy in business matters; he's half Hensley and a grouch don't die easy in that breed. The Hensleys always did want all of Eden Valley, and now that Nate Tichenor sees a bully chance to get it cheap, together with

"You Killed Him."

the Kershaw cattle, he'll grab it. Has Lorry Kershaw been in here to see me since her father died?"

"In yesterday. Told her you'd be back last night so maybe she'll call today."

"How is she? Pretty well busted up?"

"Pert as they make 'em."

"I'm not surprised. Nothing weak about the Kershaws. Well, Henry, we shall see that which we shall see."

Two days later Lorry Kershaw came into the bank. Babson, with many protestations of sympathy for the loss of her father and regret that his absence from Valley Center had militated against his attendance at the funeral, begged her to be seated and inform him in what manner he could be of service to her. To his amazement the girl looked him over coldly.

"You should be sorry for father's death," she shot at him. "You killed him."

"I? My dear Lorry, how can you say such a thing?"

"You wrote him a letter and he knew you were going to close in on him. You knew he had a weak heart—that—shocks were bad for him—yet you shocked him. You wanted to. You bought up our mortgage and called it and our notes. You're a two-gun man, aren't you?"

"My dear girl, permit me to explain. Your father's notes had been renewed four times; they were overdue and the interest was in default, and the superintendent of state banks had jumped me about them more than once. I forgot your father should be spared shocks. The law forces us to protect the money of our depositors."

"Granted. But you bought our mortgage. Why?"

"For an investment and to save it from falling into the hands of your enemy, Nate Tichenor." This was fast thinking and Babson felt a thrill of pride in his cleverness.

Her dark flashing eyes bored into his soul. "I think you're a contemptible liar."

He paled with anger, but controlled himself. "You will, of course, understand why I do not argue with you, my dear. You are under a strain—overwrought."

"You say you bought the mortgage as an investment. If I pay up the overdue interest, will you renew it for five years at the same rate of interest?"

"The present mortgage is at 6 per cent. It was made when money wasn't quite so tight as at present. I'm sorry, but a renewal will cost you 8 per cent. I'm getting that from others."

"Will you renew the unsecured notes and cut the interest on them to 8 per cent?"

"Perhaps. I'll have to have a statement of the financial condition of your father's estate first."

"The estate is land poor and cow poor and it hasn't any money. It's practically insolvent."

He threw up his hands and smiled wearily. "How like a woman to ask such favors in the face of such a statement," he sighed, then brightened suddenly. "However, we might strike a happy compromise. I was interested to note recently that your father made you a deed of gift to four thousand acres in the lower part of Eden Valley."

She nodded.

"I would be glad to entertain a proposition to buy that land from you, Miss Lorry. As agricultural land it is worthless, as grazing land it is very poor, but as a hunting and fishing preserve it is excellent. I know a man who would be willing to pay you a fair price for that land."

"How much?"

"Well, I'm pretty certain I can unload it on him at ten dollars an acre. I'll expect you to sell to me for nine, of course. I've got to have a profit."

"And if I agree to sell to you at that price, what?"

"That will enable you to take up your father's unsecured notes and rehabilitate your credit at this bank. In return I'll renew your mortgage for three years."

"At 6 per cent?" she insisted.

"Can't possibly," he defended.

"Is that your final decision, Mr. Babson?"

"Absolutely. I dislike to appear harsh, but business is business and if I permit sentiment to—"

"Please spare me your stereotyped and hypocritical maunderings," the girl interrupted angrily. "I'm not a fool and I see through you as if you were a window. Make out a satisfaction of mortgage, sign it before a notary public and give it to me. In return I will give you a bank cashier's check for the exact amount due. Hand me those unsecured notes, marked 'Paid,' and you shall have another bank cashier's check for the amount of them, with interest. There are the checks"—and she tossed them on the table before him.

He stared at them in frank amazement. "Why, where did you get all that money?" he demanded.

"That's none of your business, sir. You called upon my father to pay up in five days or stand suit. He's dead, but I'm obeying orders. Your bluff's called. Nobody has ever run a blazer on the Kershaw clan and got away with it. And you were trying to run a blazer, you know. Tried to scare me into selling you that land of mine."

He was desolated. "Do you mean to tell me you refuse the fine offer I have just made you?"

"I do. I'd rather give the land away than sell it to you."

He fled from her stormy presence and in about fifteen minutes Henry Rookby pussy-footed in and handed her the canceled evidence of her father's indebtedness.

Mr. Rookby's eyes were round with wonder and resentment as he watched her climb into her battered old car.

"By George," he said to Babson, sycophantically, "that's certainly one salty damsel, eh, chief?"

"She's a devil, Henry—a she devil on wheels. She's all the wild Kershaws rolled into one—and I'm a star-spangled jackass without brains enough to pound sand in a hole."

At three o'clock he went home, suffering from a violent headache, due solely to futile rage. But he was not at all in danger of a nervous collapse now, for the fight was in the open at last and he drew a subtle comfort from that knowledge. He knew now where Lorry Kershaw had gotten all that money. Undoubtedly she had sold her land to that mysterious power company. Well, he was routed in the lower end of the Pan, but he would go to the attack again at the upper end of the Handle. And, despite the fact that his alternative proposition would save the district the cost of erecting a huge impounding dam, Babson would gladly have abandoned it, for it carried risks and almost the certainty of expensive lawsuits which might so delay surface irrigation in Forlorn Valley as to ruin him and the Bank of Valley Center, even though at the last the valley should win the fight.

CHAPTER VII

NATE TICHENOR was at the Circle K headquarters when Lorry Kershaw came in that night from her trip to Gold Run.

"Welcome, stranger," she greeted him, as she drove up. "Come out and help me admire my new car."

He came and looked the new car over soberly. "Aren't you a little bit reckless and improvident for a girl in your financial fix?" he demanded gravely.

"You talk like Silas Babson," she retorted gaily.

"Well, I'm not objecting, Lorry, but I greatly fear this new car will be regarded by Babson as an extravagance; it's bound to hurt your credit."

"Nate, Silas Babson can take a jump into Eden Valley creek for all I care. I'm washed up with him and his bank."

"No!" he cried simulating amazement. "How come?"

"I've sold my four thousand acres below the main ranch of the Bar H for four hundred thousand dollars—cash! And I've cleaned up Babson and his little red brick bank and have a hundred thousand dollars working capital left."

"Then God's in his heaven and all's well with the world. But why did you sell your land and keep the impending deal a secret from me? Somebody wants to put a dam in the gorge and they needed your land for the reservoir. You know very well the Bar H owns the dam site; if we'd worked together we could both have sold, but now that they have your land they have a terrific advantage over me."

"But you're a low-flung rascal, Nate Tichenor, to suspect I'd leave you holding the sack. I told that man I wouldn't sell for a million dollars unless they secured your dam site first."

"I suspected the sort of girl you are, Lorry, but I wanted to make certain. Forgive my little deceit. I took the liberty of deciding to sell your land and naming the price to the Mountain Valley Power company. I would never have sold my dam site to that corporation until assured there would be no argument with you over the price of your land. Did Babson try to trade you out of your land today?"

She related to him in detail her interview with the banker.

"I should say you gave Babson a poke under the heart. How did he assimilate it?"

"As if his world was crashing about him. Perhaps I should not have attacked him with such ferocity, but I have a temper, Nate, and when a lying, scheming, hypocritical, cold-hearted snake like Silas Babson crosses my trail I like to shoot his head off."

Nate smiled approvingly. He liked the fire in her. Here was no wishy-washy, clinging vine of a girl, dependent, selfish, and sex-conscious. A man's woman with a code of conduct like unto that of a very gallant gentleman.

"A carload of smooth two-year-old steers, averaging ten hundred and fifty pounds, sold for seven cents in the Union stock yards in Los Angeles today," he announced. "Things are certainly looking up for old Rance Kershaw's girl."

She turned on him with shining eyes. "How did you get the news so quickly?"

"My valet has a portable radio."

"Your what?"

"My valet."

"Oh, Nate, I'm ashamed of you. A great, big, strong man like you, with all your heads and legs and arms and teeth! A valet! I knew you had a chauffeur, which is bad enough, but you've kept the valet in hiding." Then she was suddenly tender. "Ah, Nate, you're a dear. I had thought Eden Valley would be unbearably lonely when dad left me, but it isn't."

"I had thought the same thing with respect to myself. It wasn't my plan to remain here more than a week—"

"But you're not going away so soon?"

"Why not? I've completed my business—all except renewing the lease on the Bar H to the Kershaw estate, its heirs and assigns. I suppose you desire to renew the lease?"

"Just because you know I have a hundred thousand dollars on hand you want thirty thousand of it." With this light banter she strove to hide the shock his announcement had given her. "Yes, I'll want a renewal. When are you leaving, Nate?"

"Tomorrow morning. Will you drive this shiny new car over to Gold Run tomorrow, lunch with me there and see me off on my journey?"

TO BE CONTINUED.

CAP AND BELLS

SHORTENED HER VISIT

"For goodness sake, Bobby, why are you offering me that oil can?" asked the old aunt, who had settled down for a long stay.

"Well," explained the kid, "daddy said that squeak, voice of your nearly drove him nuts, and I thought maybe it would quit squeaking if you oiled it."

Daytime Is Night Time

Little Joan had heard her older brother discussing the difference in time to be noted between one side of the world and that on the opposite side. Joan was very much impressed and rushed in to her mother and exclaimed excitedly:

"Oh, mother, did you know that in China when it's day time it's night time and when it's night time, it's day time?"—Indianapolis News.

Couldn't Use Nickel

Joan A. of Greencastle was all ready to start for Sunday school and asked her father for a penny for the collection box. Unable to find any pennies in change her father offered her a nickel instead. This was indignantly refused.

"Them don't want nickels," she said hotly, "them only wants pennies!"—Indianapolis News.

Paying Off a Substitute

The family knew that Junior had something on his mind—that look boys have when they have a serious problem confronting them. Finally it came out.

"Dad, gimme a quarter, will ya?" Junior pleaded.

"What do you want a quarter for?"

"Well, I promised a guy a quarter if he'd lick another kid for me!"

AFTER THE SERIES

"You seem to be sticking very close to business these days."

"I need the relaxation. The baseball season is a terrible strain on a man."

Report

The freight agent on one of the western roads received a shipment on which a donkey, described on the freight bill as "one burro."

After checking his goods carefully, the agent made his report: "Short, one bureau; over, one jackass."

Up-to-Date

"That Miss Blonde is much older than I thought," remarked a young man to his friend in the boarding house.

"What makes you think that?" asked his friend.

"Well," he replied, "I asked her if she had read Homer's 'Iliad,' and she said she read it when it first came out."—Stray Stories.

Get Ambitious

"Where's ald Bill been lately? I haven't seen him for months."

"What? Haven't you 'eard? He's got three years for stealin' a car."

"What did he want to steal a car for? Why didn't he buy one an' not pay for it like a gentleman?"—Stray Bits.

Truth in Advertising

First Salesman—I'm from New York and I manufacture Persian rugs. Where do you come from and what is your specialty?

Second Salesman—I'm from New York, too. I make genuine antiques.

Sad Parting

Wife (after tiff)—You brute! I'm going to get the baby and go to mother's.

Husband—Yes, and I'm going to get the jewelry and go to uncle's.

She Was For It

He (during argument)—For goodness' sake, let's talk sense!

Her (sweetly)—Yes, cents and dollars.

Makes Impression

PATTERN 9040

This frock has been designed upon the principle that one should always leave a good impression behind one. Look at the little sketch of the lady walking away. Hasn't she saved the prettiest part of her frock to show us last? See how clearly the ends of the combination sleeves and yoke knot at the neck! And don't you like the bow at the waistline? It is a divine little frock in plaid or flowered fabric, but the woman who never wears a fancy fabric can make it up in a plain one and be delighted with it. And the making is surprisingly easy.

Pattern 9040 may be ordered only in sizes 14, 16, 18, 20, 32, 34, 36, 40 and 42. Size 16 requires 3⅝ yards 36-inch fabric.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Complete, diagrammed sew chart included.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth street, New York.

SOMETHING NICE

Hubby—The bank has returned that check.

Wife—Isn't that splendid! What can we buy with it this time?—Answers (London).

Not Worth It

Mazie (showing photograph)—This is my new boy friend—he's in the lost property office.

Madge—Hm! I shouldn't trouble to reclaim him if I were you.—London Answers.

Preparedness

"Why did you engage that man as cashier? He squints, has a crooked nose and outstanding ears."

"Of course. He will be so easy to identify if he ever absconds."—Hummel (Hamburg).

BUG REPARTEE

Bug—But you're a ladybug.

Ladybug—Well, I wish you were a gentleman bug!

He Knew

The teacher asked whether anyone could give her a good definition of toast. Only one hand went up.

"All right, John, you tell us about toast."

"Toast," said John confidently, "is burnt bread scraped."

And Weren't Playing

Dentist—Have you seen any small boys ring my bell and run away?

Policeman—They weren't small boys—they were grown-ups!—Humorist.

The FARMERS CORNER

by RALPH H. TAYLOR

Executive Secretary Agricultural Council of California

A modified state income tax, designed to equalize distribution of the tax load, as well as to bolster state revenues, is almost certain of enactment at the forthcoming session of the state legislature.

Such, at any rate, is the judgment of many of the state's leading fiscal officers and tax authorities who are casting about for ways and means of balancing the state budget.

Several income tax proposals, with varying rates, will undoubtedly be introduced when the lawmakers convene at Sacramento in January, but it is generally anticipated that the tax finally agreed on will yield in the neighborhood of $12,000,000 biennially.

An income tax embodying excessive rates, according to the financial experts, is impracticable, inasmuch as it would drive capital from the state and defeat its own purpose. But a modified tax on personal incomes, patterned after the levies adopted in several other states in recent years, will have the backing this year of many groups which formerly opposed all forms of income tax, due to seriousness of the financial dilemma confronting the state.

With more than $100,000,000 in new revenues required to close the present gap between income and outgo and wipe out the state deficit, the estimated $12,000,000 in returns under an income tax becomes an important factor.

But even more important, according to some of the fiscal officials, is the imperative need of further tax equalization to eliminate injustices and discrimination.

It is admitted, for example, that the 2 1-2 per cent sales tax falls more heavily on the man or woman of small income than on the wealthy. Yet, the state's financial officers maintain, the sales tax revenues are absolutely essential to permit adequate support of the state school system during a period when general fund revenues are far below normal and insufficient to meet the regular expenditures of government.

The income tax, it is claimed by its sponsors, will offset some of the inequalities of the sales tax, as it will be chiefly a tax on the wealthy and on men and women in the higher salary brackets.

And various business and industrial groups which have previously fought the income tax, recognizing the vital need of tax equalization if the sales tax is to survive, are expected to withdraw their opposition to the income levy at the next session of the legislature.

Out of the welter of the depression, in the opinion of many of the leaders in state affairs, has come a new willingness on the part of various taxpaying groups to seek a greater measure of fairness and equality in taxation—a new appreciation of the other man's problems.

And in that spirit, they contend, is real hope of reaching an equitable solution of the tax problem, regardless of the various tax proposals finally selected to balance the state budget.

Our Venomous Snakes

This country's four venomous species of snakes are the rattlesnake, the copperhead, the coral and the moccasin. Some classifications will give as high as 27 different species that are poisonous, but this list includes 15 different classes of rattlers which differ only in markings and localities in which they are found.

Shed Their Wool

Porpoises and whales are covered with wool before birth, but, having no use for it afterward, nature causes it to disappear. The same is true, in a slight degree, of human infants who frequently have much more hair when they come into the world than they do a week or two later.

Pheasant Life Hazardous

Sixty per cent of our potential pheasants never get a chance to get out of the egg, due to mortality factors which beset them before they are hatched.

No Excuse

"Tain' no excuse to say you have done your best," said Uncle Eben. "If you is goin' to do any real good you got to keep right on tryin' to do better next time."

Better Breakfasts

HAVE a breakfast you'll scramble for these first days of sharp weather. Begin it with a baked apple. Then have cereal and cream. Stow away some sausages with scrambled eggs, and a cup of coffee which completes a mighty good breakfast. The sausages should have a steaming hot sauce. Here's the way to make that delectable dish known as

Manhattan Sausages: Remove the pork sausages from a small can, and fry in their own fat. Remove to a hot platter. Add to the sausage fat two tablespoons diced celery and one tablespoon diced green pepper, and fry a few minutes. Add three tablespoons chili sauce, heat and pour over sausages. This serves three or four.

Important Coffee

Breakfast coffee is all important. It should taste just right, and the most important means of attaining this end is to serve coffee that is strictly fresh. Fortunately there is a way of being always sure that your coffee is fresh. That is to buy one of the many brands of vacuum packed coffee. You'll see the words "vacuum packed" on the cans containing these brands in every grocery store, and when coffee is vacuum packed the air can't get in to make it deteriorate and the taste can't get out to disappoint you. Every bit of coffee in a can with those words on it comes out as fresh as a daisy and insures that you'll enjoy it. Pick out a good brand and try it if you haven't done so before.*

Group No. 1 of the Congregational guild will meet Thursday with Mrs. Hazel Baum at 1153 Washington avenue in Willow Glen. Mrs. Greene will be co-hostess. Cars will leave the church at 2 o'clock, providing transportation for those who require it.

Mr. and Mrs. William Bachman and daughters Marjorie and Betty Ann were recent visitors in Fresno.

George Burrow, local Kiwanian and sponsor of Campbell Sea Scouts, has announced the third annual Sea Scout card party which will be held Saturday evening, Dec. 8 in the kindergarten room of the grammar school.

A meeting of the Townsend Old Age Pension club was held this evening in Campbell grammar school.

THE TRUTH

ABOUT HAIR AND HAIR TREATMENTS

You may be one of millions who has wasted time, hope, money on "tonics" and treatments . . . Now Charles Nessler, inventor of the permanent wave, leading hair scientist, author of "Story of Hair", makes a simple but revolutionary discovery that ends

BALDNESS • DANDRUFF
OILINESS • THINNING HAIR

In the past, tonics and treatments tried to stop hair from falling. That is as useless as to try to stop an animal from shedding! What you must do is make your scalp replace the hair that falls—in short, complete the hair growing cycle.

It is on that scientific principle that Charles Nessler's Pro-Ker is based. 30,000 tests have proved that Pro-Ker produces results. Hair for hair, it makes the scalp replace falling hair with new hair.

Enjoy your birthright—beautiful, lustrous hair. Send for Charles Nessler's revealing booklet. Better still, buy Pro-Ker at your druggist, or mail the coupon below.

Charles Nessler's PRO-KER

Free from Alcohol — An excellent Hairdressing

Pro-Ker Laboratories, 400 Madison Ave., New York

Birthday Party for David Anderson

Mrs. Frank R. Anderson entertained at a party Monday afternoon in honor of her son, David, who celebrated his eighth birthday on that day.

The children enjoyed various games at which Malcolm Martin, Carolyn Burgess and Marilyn Anderson won prizes, while their elders enjoyed an afternoon of bridge. Refreshments were served late in the afternoon.

Present were Mrs. Stuart Burgess and daughters, Mary and Carolyn; Mrs. Mary Brookley and children, Joyce and Billy; Mrs. Dan Yeager and son Alson, Mrs. Richard Knappen and son James, Miss Gertrude Bohme, Malcolm Martin, and Marilyn and David Anderson and the hostess.

Perfume Quiets Nerves

In Asia, perfume is widely used to quiet the nerves and aid digestion. Many Oriental peoples rest after each meal, inhaling favorite scent, in the belief that the mental state thus created induces a relaxation and contentment beneficial to assimilation.

Wonderful Nature

Nature gives to every time and season some beauties of its own; and from morning to night, as from the cradle to the grave, is but a succession of changes so gentle and easy that we can scarcely mark their progress.—Dickens.

SUGGESTIONS for the HOLIDAYS

• • •

We have just received a fresh shipment of Johnston's Candies Priced from 10c to $2.00

• • •

We take subscriptions for your favorite magazine at regular publisher's prices. We can give you the advantage of club combinations.

• • •

Cigars are selling now under a code restriction so that you may purchase your favorite brand by the box with the assurance that the price is the same as in the largest down-town store.

• • •

Have you seen the *New Gillette Razor?* The Aristocrat one-piece razor with 10 Blue Blades, priced at $3.79

Bargain Rate Electricity

½ OFF

ON ALL EXTRA ELECTRICITY used in the home and for commercial lighting thruout the P. G. & E. System

★ ★ ★

For a 12 months period beginning after the December, 1934, meter reading, the amount of money by which your bill for any one month at same location exceeds your bill for the corresponding month a year back will be discounted 50%.

Talk about bargains—more for your money. Read this message. You'll see that it is going to pay you for a WHOLE YEAR to take advantage of this Bargain Offer.

Think of the times you have used broom and dust pan. You thought to economize. You let the vacuum cleaner stand idle. But that will hardly pay now. A vacuum cleaner on our regular rate works NINE hours for only FIVE cents. Now, beginning in December, you can have NINE EXTRA hours of vacuum cleaning each month over the corresponding months of last year for 2½ cents. Your vacuum cleaner sweeps so much better—so much easier. Make it do EXTRA work at half cost.

Then, too, there is hardly a home but what needs better lighting. EXTRA light, by putting new bulbs into empty sockets, by using more lamps, will mean easier reading, more comfort, more cheerful rooms and protection to the eyes.

Plan electric meals that will put idle appliances to work, such as waffle iron, coffee urn, toaster, grill, etc. Make these appliances give you EXTRA service with Extra Electricity at half price. You see it is not a matter of more appliances; just use your appliances more.

To families who are modernizing their homes this ½ Off EXTRA Electricity is an exceptionally attractive bargain offer. You may install an electric range and water heater to qualify for the rate with a low block of one cent per kilowatt hour. With ½ Off Electricity you can operate the range and water heater for as low as ½ cent per kilowatt hour.

Or you may install an electric refrigerator that would normally cost $1.50 a month to operate. With EXTRA Electricity you cut that normal operating cost in half or to seventy-five cents a month. ½ Off on EXTRA Electricity is certainly cheap Electricity.

★ ★ ★

Plan Now for Better Living through a whole year with ½ Off on EXTRA Electricity

HIGH SCHOOL NOTES By R. B.

The high school board of trustees at their last meeting authorized the shop class to cut the flag pole in half and put a hinge on it. The also decided to order the diplomas for graduation from the same publishers they purchased them from last year.

—CUHS—

A student body dance will be held in the annex this Friday evening, Nov. 16. The school dance orchestra under the leadership of Anthony Corbisiero will furnish music.

Committee members for the affair include: Mr. Noddin, T. Farley, F. Smith, B. Howe and G. Joseph, tickets; S. Manfre, F. Chesney, Y. Stubbe and P. Arnold, refreshments; E. Knopf, J. Worrie, A. Heinsen, T. Knopf, clean-up; R. Lowrie and F. Starr, check-room; R. Lowrie, W. Green and F. Starr, decoration.

—CUHS—

Campbell's two lightweight basketball teams played Santa Clara Friday night on the local court. The 110's won an easy victory, the final score being 23-15. Vincent Fisci again showed his ability by tallying 12 points. Glen DuBoise made a personal score of 7 points while George Kurasaki made 4 and Tom Ogeno 2.

The 120-pound team did not fair so well, being nosed out by a 27-25 score. Confronted by an older, heavier, and more experienced team, the Campbell boys nevertheless made an excellent showing.

Last Tuesday evening Campbell quints journeyed to Mt. View and played a double-header. The 120's lost 27-14, while the lighter squad took the valley championship by beating their opponents 34-14. Glen Dubois ran up a score of 16 points, Vincent Fisci, scored 10, George Kurasaki, 4, and Nick Pisano and Tom Ogino, 2 each.

—CUHS—

Wilbur Morton, accompanied by Jeannette Wellington at the piano, will play a trumpet solo at the forthcoming White Shrine entertainment in San Jose. The string trio, David Bohrman, violin, Martha Jane Bohrman, cello, and Juanita Knowles, piano, will also appear on this program.

C. P. Klassen has been engaged by the high school board of trustees to direct vocal classes in the music department. Under his supervision will be the glee club, operetta and the second orchestra.

—CUHS—

A 40-minute student body program meeting was held in the grammar school auditorium Tuesday morning. The program was in charge of the shop class and its director, M. F. Hughes, had secured the services of Dr. H. A. Sotzin, director of industrial arts at San Jose State college, for the occasion. Dr. Sotzin's talk was well received.

—CUHS—

Twelve Future Farmers from the local chapter will leave Thursday night for Los Angeles. A special car will pick u pthe students in San Jose, collecting other delegations as the train proceeds south.

The students will be shown through the Universal motion picture studios on a specially conducted tour. They will also enjoy a trip through the broadcasting station KHJ, and on Saturday they will attend the U.S.C.-Oregon football game. Faculty advisors accompanying the boys are C. E. York and R. C. Fitzsimmons.

Planning to make the trip are Anthony Satariano, Joe Conetto, George Kurasaki, George Lawrence, Don Canciamilla, Stanley Scheley, Anthony Sunzeri, Vernon Withers, Donald York, Ali Bianco, Tom Ogeno and Frank Miyahara.

The purpose of the pilgrimage is primarily to attend the western livestock exposition which takes place in Los Angeles the latter part of the week.

—CUHS—

Girls of the Campbell union high school were hostesses at a play day Thursday afternoon. Their guests were the first and second girls' hockey teams of Palo Alto and Los Gatos high schools. Following the games refreshments and dancing were enjoyed in the gym.

Salvation Army Announces Series Special Meetings

San Jose, Calif. 11-12-34
Editor Campbell Press
Dear Sir:

May I ask that you make an announcement for the Salvation Army, namely, that Lieut.-Col. Blanche B. Cox, a pioneer woman officer of the Salvation Army, will conduct a week of special meetings in the San Jose Salvation Army hall, 275 W. San Fernando street Nov. 18 to 25, at 7:30 each evening.

This officer has done work in England, India and the Hawaiian islands. An able speaker, lecturer, editor, and a defender of the fundamental teachings of Christ.

Sincerely,
Maj. H. O. Winter

Bridge Club Met Thursday

Members of her bridge club were delightfully entertained last Thursday evening by Mrs. Frank R. Anderson. Mrs. Horace Lea received high score prize, and delicious refreshments were served at midnight.

Other players were Mrs. Julius Bachman, Mrs. Percy Dunlap, Mrs. Richard Knappen, Mrs. William Ohlen, Mrs. Floyd Bohnett and Miss Gertrude Boehme.

The Japanese language school house on Payne avenue has been torn down and moved to the Y. Yamada ranch on Prospect road, where it will be re-assembled and put into service soon.

Students of both the high and grammar schools enjoyed a full day's vacation Monday, Armistice day.

Harold Shelley was a wek-end guest of friends in Fresno.

Sam Patch, the Diver

Samuel Patch, famous as a diver, was born in 1807. In his youth he went to sea, but later became a cotton spinner at Paterson, N. J. He made a reputation for feats in diving, the leap which he took from the bridge spanning the Passaic, a distance of 80 or 90 feet into the pool below the falls, attracting wide attention. Thereafter he traveled over the country diving from the topmasts and bowsprits of sailing vessels. At Niagara falls he made a leap of more than half the height of the falls. Dissatisfied with this performance, he advertised a leap of 125 feet at the Genesee falls, in which he lost his life in November, 1829.

ANNOUNCES NEW POLICY

Ralph H. Hyde, who lead all Northern Life insurance agents in production on Pacific coast for October has just received word from his company of a new policy he will be allowed to use in Campbell and vicinity. This policy is called the "Salary Continuance Plan," and affords maximum protection and benefits at reduced cost. Watch for next week's announcement.

To the Voters Of Campbell

I want to express my heartfelt thanks for the honor you have conferred upon me in electing me coroner and public administrator of Santa Clara county.

My one great desire is to serve you faithfully, economically and impartially in the discharge of the duties of this important office, thereby fulfilling the pledges as made by me during the entire campaign.

To the many friends who worked so faithfully in my behalf during the primary and the final election Nov. 6, please accept my sincere thanks, for I realize your loyalty and hard work made my victory possible.

Sincerely,
C. C. Spalding

The Guppyi Fish

The female guppyi fish is about an inch and a half long, and is gray. The male is smaller, and so colored that he has been called the rainbow fish. He is covered with tiny spots in brilliant shades of orange, green, pink, purple and blue, accented by black spots and lines. The young are born alive instead of from the egg, and are gray like the mother. The males acquire their color when they are about two months old.

First "Bowler" Hat

The first "bowler" hat was made about 1850.

To those who say the Government has taken over all relief, Harry L. Hopkins, Federal Relief Administrator, says:

"Federal funds for unemployment relief can go only a little beyond providing the physical necessities of life. Community demands for other social welfare services must be met almost entirely from local resources. The larger part of the funds for these needs will have to come from private giving to Community Chest and similar campaigns."

The problems of child welfare, health, recreation and character building have true significance in the local communities. There is no way that Federal relief funds can be applied to these broader needs of social welfare.

'LEND A HAND'

Now is the time to protect Our Chest and thus help to stabilize our community. Certainly the Government is helping, but each local community has to do its own part.

Co-operation and team work between Our Chest and the Federal Government is the way to succeed—it is not a one-sided job. Accept your responsibility and do something.

CAMPBELL COMMUNITY CHEST

CALIFORNIA
News of the Week

Governor Frank Merriam's overwhelming victory has caused a rift in Democratic ranks, one faction wanting to purge the party of Epic and the other branch demanding that all those who refused to support Sinclair's ideas be "read out of the party."

Sacramento continues to lead the states in the volume of bank debit gains, weekly totals exceeding last year by nearly 300 per cent. Eleven of the 14 leading California cities recorded increases, only San Francisco, Pasadena and Berkeley showing losses.

Due to the passing of Proposition No. 7, 200 state board of equalization members will be blanketed into service under Civil Service provisions, said Attorney General U. S. Webb. Present employes need not pass examinations but must serve apprentice periods.

Two California fall flower shows have just ended. Feature of the Monrovia exhibits were tiny flowers which bloomed in thimbles. Special interest was shown in the children's division of the show given at Sacramento by the Garden Club.

Palo Alto has offered bargain hospital rates to her citizens and has appropriated $7000 to help cut costs. Residents may have their hospital bills reduced $2.50 a day for not more than 21 days. Already many have been helped who might otherwise have lost their lives.

While a Riverside county prison camp is being removed from Dripping Springs to the Banning side of the San Jacinto mountains, the leading city of its neighboring county, San Diego, is planning a prison farm to care for the hordes of transients which are crowding San Diego city jails. Prison farmers will raise fruits and vegetables.

Ten years for robbery and life imprisonment in Folsom were the sentences Superior Judge Donald Geary meted out to Frank B. Hoyt. The life sentence was for killing an officer in an attempted holdup.

Hayward's Armistic Day parade had a unique touch in that cars built before 1917, the year America entered the War, headed the procession.

A total of 7446 students in 78 California colleges and universities will receive Federal Emergency Relief Administration aid this winter. The students will receive a total monthly allotment of $11,690, and will work on research, clerical, library and laboratory projects.

G. A. Elliott, San Francisco engineer, has been appointed by Orange county supervisors to revamp the county's water control and conservation plans. Diversified opinions as to how and where to build a dam in the Prado basin have led to a deadlock and it is hoped the appointment will unify opinion. The county plans to ask the Federal government for $14,455,500 for the project.

Thirty-six years after being severely wounded in the Spanish-American war, Jacob D. Hoekstra of Red Bluff has been awarded the Purple Heart medal by the War department.

No sooner had Sir Charles Kingsford-Smith crossed the Pacific than his famous plane, Lady Southern Cross, was attached for an asserted unpaid debt of six years ago and placed on sale in Los Angeles.

Dr. Robert E. Cornish, the young Berkeley scientist who has returned dogs to life, has received several offers from human beings who are willing to submit themselves to his experiments. A disabled war veteran said he would die for a mere $300,000. A Canadian wrote that he was ready to give his body for $200,000.

November 18 is the date of the new Tahoe-Ukiah highway opening. Circling the lakes of Lake county, the new road will connect Emigrant Gap with the San Francisco-Reno highway.

A world-wide health survey reveals that San Francisco has the lowest baby death rate of any city in the United States 39.3 per 1000. The birth rate is also lowest, being 10.3 per 1000.

An average gain of $300 a month so far this year has marked business transactions of the Marysville postoffice.

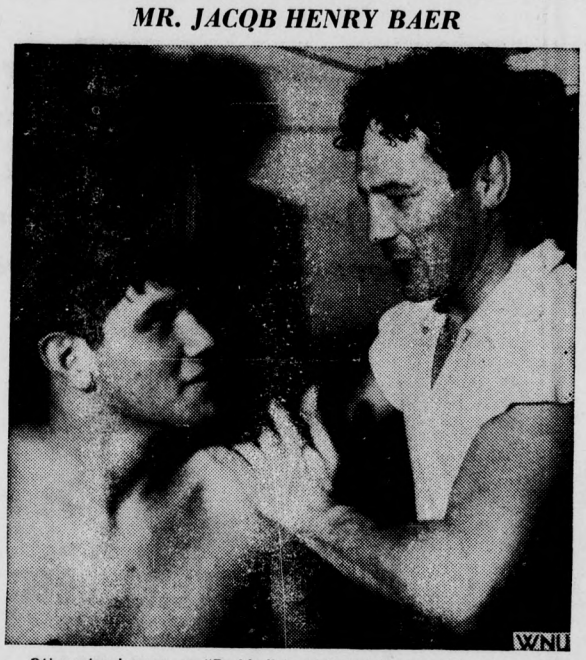
Estimating a prison population of 10,669, wardens of three California penitentiaries have asked the department of finance for nearly four million dollars in proposed budgets. This is almost $500,000 more than the last biennium request.

All fire suppresion crews of the state forestry division have been discontinued since the statewide rains. Due to SERA and CCC, state fire suppression equipment for 1935 will be the most complete in history.

CAN LAND SAFELY IN RAIN

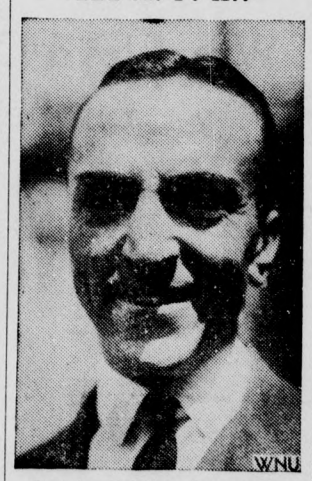
The day before Armistice day, army officials formally celebrated completion of the new all-weather landing mat at Crissy field, adjoining San Francisco's presidio. An air show of formation flights, stunting and landing and taking off in water thrilled the audience that witnessed the event. The new mat, completed by SERA workers under orders from the war department, offers safe landing facilities in all kinds of weather. Photo above shows a panorama of the field with Fort Winfield Scott in the background.

MR. JACQB HENRY BAER



Otherwise known as "Buddy," is pictured here as his big brother Max, heavyweight champion, gives him a rub-down. Buddy is in Los Angeles to pursue a ring career. He stands 6 feet 6½ inches and weighs 199 pounds. His reach is two and a half inches longer than that of Primo Carnera; his feet require No. 14 shoes.

221 M. P. H.!



Captain Eddie Rickenbacker, World War ace, who piloted a twin-motor 14 passenger airliner across the continent from Los Angeles to New York in 12 hours and four minutes to shatter the old transcontinental record by nearly an hour. Two hundred and twenty-one miles an hour was his average for the 2609 mile flight.

INDICTED

Photo shows Buron Fitts, district attorney at Los Angeles, who has been indicted for assertedly giving perjured testimony before the 1931 grand jury in connection with the so-called "girl mart" case. Fitts attributes the charges to "politics."

Farmers in the Yuba City district are having trouble electing district directors of the California Canning Peach Growers.

BACKS PRESIDENT

A. P. Giannini, California banker and president of the Bank of America, who has just returned from a convention of the American Bankers' association at Washington. In a statement made upon his arrival in San Francisco Mr. Giannini declared himself thoroughly in favor of the present administration, adding, "The President has been able to retain the good will of the masses and that is all-important in bringing about orderly economic and social progress."

COSMIC RAY DATA STUDIED BY PASADENA SCIENTISTS

Pasadena — (WNU) — Dr. Robert Millikan at the California Institute of Technology is studying the reams of data gained from the recent stratosphere flight of Professor August Piccard, Belgian scientist, on the cosmic ray. Most significant of the material presented by Piccard is a photographic plate, recording the actions of an electroscope sensitized to radiation of the cosmic ray. The mechanism is made of quartz fibers enclosed in a container. As the balloon containing the electroscope soars higher, the quartz fibers deflect more and more, the action being caused by some rays emanating from the earth and whose activity is hampered by the earth's atmosphere.

Nearly 200 Mare Island workmen are now engaged in building two new destroyers, the Smith and the Preston. The keels were laid on Navy Day.

STATEWIDE
Farm & Ranch News

The California farmer is better off than he was last year. Based on present crop values and production forecasts, the state department of agriculture estimates that the farm value of California's 1934 crop production will total about $434,065,000, which betters the 1933 crop by $32,000,000. Four million dollars of this year's figure consists of benefit payments to farmers due to wheat and cotton reduction and the corn hog program. For comparative statistics, the 1933 field crop in California amounted to 7,504,000 tons, with a farm value of $106,330,000. The 1934 crop, it is estimated, will amount to 6,914,000 tons, with a value of $118,870,000. As for the fruit crop, the 1933 production was 4,075,000 tons and had a value of $128,124,000. This year's estimate is 4,071,000 tons valued at $135,195,000. The 1933 truck crop brought $54,941,000. This year's estimate conservatively places the value at $60,000,000. Last year's livestock industry was value at $113,000,000. The California estimate for this year shows about $120,000,000. Production of feed and grain and forage crops for this year is about 92 per cent of 1933's total. Abnormal rainfall is given as the reason for the reduction of this crop.

Riverside county dairy and livestock men are receiving pamphlets telling them how to obtain short term government-directed loans to finance their seasonal operations. General financing for crop production, from spring planting to harvest, is also explained.

Several Napa county grape growers have sued the Di Marco Winery for failure to receive the local market price for their 1933 crop.

Imperial Irrigation district farmers will be prorated water according to the total acreage owned, regardless of the amount of land under cultivation.

The Citrus Heights Farm Bureau, Sacramento, has set aside $50 in scholarships to help San Juan High school students defray entrance expenses at agricultural colleges.

In the agricultural census to be made in California this year, farmers will be asked to fill out a 100-question document which will be used primarily by the many Federal emergency agencies.

Three citrus marketing concerns and many packing houses in the Redlands district will hold annual meetings between November 21 and January 10.

San Fernando valley poultrymen met recently to discuss labeling of cold storage eggs and to acquaint themselves with the present state of the Southern California egg marketing agreement.

Relaxed Federal quotas on imported wines are causing large losses to California's wine and grape industry, declares Harry A. Caddow, secretary of the Association of Western Wine Producers.

Canning at the Lindsay Ripe Olive Company plant has begun with 3000 tons of olives already received.

Within a stone's throw of the San Diego courthouse are grown prize pumpkins weighing as much as 35 pounds apiece.

Yukaipa has closed its 15th annual four-day apple show. Turkey was served all day during the final show-day.

In a county-wide poll approved by the AAA, Tulare county farmers voted in favor of voluntary hog control for 1935.

With only 24,000 tons of hay in the region, Imperial valley ranchers are facing a serious feed shortage. Most of the supply of hay will be used to feed horses working on the All-American canal.

With the season little more than half over, El Cajon tomato shippers report an excellent year. Over 30 carloads of tomatoes have been shipped, each car representing 630 packed crates.

The Canners' League of California reports the pack of pears and freestone peaches to be the heaviest in five years.

Lettuce shipping is about over in the Watsonville district, where as many as 160 cars a day have been loaded.

Export shipments of navel oranges from the Porterville district are moving to San Francisco to be consigned to China and Manila. Tulare county navel crop is estimated to be 25 per cent heavier than last year.

In an effort to prevent demoralization of the market, the California Turkey Growers Association has warned its members that the Thanksgiving turkey market is being oversupplied. It urges farmers to hold back their birds if possible

Eckener, a Real Man
Wasted Mail Advertising
One Happy Man
How Many Would Die?

Dr. Hugo Eckener, who has flown 600,000 miles in his Zeppelins and about 400,000 more miles teaching young pilots, is in New York.

It is a pleasure to see such a powerful person, well past sixty, planning a new line through the air between the United States and Europe, "coast-to-coast in 48 hours." He, of course, would run the ships on the first few trips himself.

A government spokesman urges advertisers to advertise by mail, writing "Dear Mr. Jones" letters, teling what the advertiser has for sale.

Eugene Meyer, Jr., who owns the Washington Post, says that is wrong and means government competing with honest, long-suffering newspapers and their advertising profits.

He asks, by implication, how can the press be free if you take away its money?

That worry is unnecessary. The advertiser who tries to advertise by mail throws money out of the window and soon finds it out. And advertisers are intelligent.

One happy man exists in spite of depression; his name, familiar to you, Henry Ford. As far as he is concerned, the depression is ended. To prove it he will build one million cars "or more" this coming year. That is a good sign, since it proves that there must be people able to buy one million cars.

Henry Ford says truly that Americans don't "want a dole," and those that take the dole always turn against those that give it.

There is, however, the fact that America doesn't want revolution, or too many dangerous riots, and you may take it from the British that the dole is cheaper than revolution. England was near enough to the French revolution to realize that.

President Knubel of the United Lutheran Church of America worries about the future of religion. Anti-religious forces, he says, are growing constantly in this and other countries; hundreds of millions of people are "spiritually blind." Rev. Dr. Knubel asks, "How do you know that in two years from now you might not be asked to die for your faith?"

Let us hope it will not be as bad as that, while wondering respectfully how many would be willing to die, or, like the ancient martyrs, court death for the sake of martyrdom.

There are various ways of making a living in America, that finds it so difficult to conquer lawlessness. One way is to smuggle in Chinese, inflicting fearful hardships upon the unfortunate immigrant Chinese and charging them from $1,000 to $1,500 for bringing them here. Smuggling Chinese is connected with the opium traffic. While smuggling in Chinese you can also smuggle with each one a considerable amount of opium.

Federal agents looking for opium found eighteen frightened Chinese in an isolated house in New Jersey, guarded by a powerful negro from Trinidad and five police dogs that would have mangled the unfortunate creatures had they tried to escape. Friends expected to bring the fee for smuggling them in failed to appear, hence their detention.

Doctor Lahy of the New England hospital says the much discussed experiment of transplanting in men the glands of monkeys is a failure. However, partial transplanting of the parathyroid gland, from one human being to another, has proved successful, opening up new possibilities.

Failure of monkey gland transplantation is not bad news. There is enough of the monkey in man up to sixty years of age to make any monkey gland transplanting at that age seem unnecessary.

Japan is busy fortifying South Sea islands that she holds under mandate of the League of Nations, and complaint is made aimlessly.

Nothing to surprise anybody in that fortification news. Japan is an intelligent country.

It takes a country with statesmanship in the dodo class, like ourselves, to possess Guam and fail to fortify the place.

The achievements of the admirable flyers, Sir Charles Kingsford-Smith and his aid, Capt. P. G. Taylor, proves that the United States knows how to build airplanes. The plane that came across the Pacific from Honolulu, 2,408 miles, in fifteen hours, beating by ten hours the best record, is an American Lockhead plane built at Glendale, Calif., and the engine was built by the American Pratt & Whitney Aircraft company.

If the United States should ever get really interested in building the world's greatest air fleet, as it will do, or bitterly regret it, the material is at hand.

United States Leads With Big Telescopes

Work is now in progress at Newcastle on a new 36-inch telescope for Greenwich observatory.

This telescope, it is stated, will be the biggest in use in Britain, but it is much smaller than some of those elsewhere.

In this respect North America leads the world. With the completion recently of the new 69-inch telescope for the Perkins observatory in Delaware, it now has the world's three largest telescopes.

The biggest of all is the 100-inch instrument at the Mount Wilson observatory in California, and the second biggest is 72 inches at the Dominion Astronomical observatory, Victoria, B. C., Canada.

Britain had the earliest of the really big telescopes, a 60-inch specimen, made in 1842. It has now been dismounted, and is at the Science museum at Kensington. It is unlikely that England will have any more telescopes of this size—climatic conditions aren't good enough to justify the expense of making them for a British observatory.—London Answers.

With Due Respect

He was a Chinese, and had been invited to dine at little Cuthbert's home.

His mother was anxious that their guest should not be made uncomfortable by the boy's curiosity, so she took him aside and explained all about the yellow skin and almond eyes of the Mongolians; she even showed him pictures of Chinese. More than anything else she impressed upon Cuthbert that the visitor was his father's friend, and to be treated with every respect.

When the celestial arrived, Cuthbert tried hard not to stare or look curious, but at last he cried: "I say, mummy, if he wasn't our friend, wouldn't he be a funny looking man?"

Why Liquid Laxatives are Back in Favor

The public is fast returning to the use of liquid laxatives. People have learned that the right dose of a properly prepared liquid laxative will bring a more natural movement without any discomfort at the time, or after.

The dose of a liquid laxative can be varied to suit the needs of the individual. The action can thus be regulated. A child is easily given the right dose. And mild liquid laxatives do not irritate the kidneys.

Doctors are generally agreed that senna is a *natural* laxative. It does not drain the system like the cathartics that leave you so thirsty. Dr. Caldwell's Syrup Pepsin is a liquid laxative which relies on senna for its laxative action. It gently helps the average person's constipated bowels until nature restores their regularity.

You can always get Dr. Caldwell's Syrup Pepsin at any drug store, ready for use.

Large Numbers

"Gert seems to have quite a head for figures, doesn't she?"

"I should say so. She says she has the number of numberless admirers."

CREOMULSION

Your own druggist is authorized to cheerfully refund your money on the spot if you are not relieved by Creomulsion.

COUGHS

DON'T NEGLECT YOUR KIDNEYS!

IF your kidneys are not working right and you suffer backache, dizziness, burning, scanty or too frequent urination, swollen feet and ankles; feel lame, stiff, "all tired out" . . . use *Doan's Pills*.

Thousands rely upon *Doan's*. They are praised the country over. Get *Doan's Pills* today. For sale by all druggists.

Washington Digest

National Topics Interpreted
by William Bruckart

Washington.—It has been seldom since President Roosevelt took the helm of government that Washington has witnessed such an upheaval of conditions and plans as has occurred in the last few weeks. Part of the changes result naturally enough from development of plans for submission of new national policies to congress which will convene again in about six weeks. The other part comes from a sudden determination by the administration to revise its recovery methods.

Jobs, Not Gifts of Money

Possibly the most significant of the forthcoming change in recovery plans is the determination to try, at least, to get away from direct relief. Instead of plain gifts of money, the administration is now seeking to find additional means for creating work so that individuals needing help may obtain their relief in the form of jobs for which the government will pay.

Officials still are loath to discuss exact figures, but they are, nevertheless, going steadily forward with plans for converting the vast federal relief machinery into an extensive program that will embrace such things as slum clearance, low cost housing and rural rehabilitation.

Mr. Roosevelt will wait until the last moment before he fixes in his own mind how many hundreds of millions of dollars will be needed to carry out these projects. The total cost obviously will depend somewhat upon how quickly the dole can be abandoned. It may run into billions of dollars because, according to some authorities, removal from the dole is going to be opposed by certain types of persons. And, it seems, they can hardly be blamed because once the government altered its traditional policy and made direct gifts of money it created a new psychology and the people who benefited thereby quite naturally will be unwilling to have the source of the gifts closed for this easy manner of living.

One of the plans under consideration as a part of the whole program is provision for employment by direct federal subsidy for housing. Under this plan, the government would advance part of the cost for individual homes of low price construction.

In keeping with the theory that the number on relief rolls will descend in direct proportion to the revival of private construction, advocates of this plan contend that the cost would be less than outright relief. They say that with the government advancing part of the funds needed, private lending agencies would feel more secure and would offer aid in the form of the remainder of the loan necessary.

• • •

Need Private Construction

It has long been recognized that recovery cannot be accomplished without a tremendous increase in construction. Private construction, however, will not go forward in a period of uncertainty now no more than it has in other years, and the experts have decided that the government must take the lead in this direction. They have advised the President there can be no real upturn in private building operations unless a start is made by the government. Whether this is the right theory, of course, none can foretell. It may turn out to be the government is pouring additional funds down just another rat-hole as it has on numerous other occasions in the course of recovery experiment. My conversations with men in both public and private life, men who are qualified to judge, lead me to believe that there will be considerable construction resulting from this program. The conclusions which have been expressed to me, it must be said frankly, do not indicate that there will be any such total of new construction development under the new administration program as the enthusiastic exponents of the program now contend.

There are numerous reasons for these conclusions as they have been explained to me. One of these reasons and perhaps the most important, is that no one is going to build a house unless he feels that he can continue to pay for it.

• • •

Easing Up on Bank Loans

Another road which the administration is now following in its efforts to cause money to flow more freely is the recent ruling easing restrictions on bank loans. Heretofore, banks have not been permitted to make loans of more than 10 per cent of their capital and surplus for industrial purposes to one borrower. The treasury now has abrogated this provision, long regarded as a sound banking ruling, and has told the banks they can loan more than 10 per cent provided the amount loaned above 10 per cent is guaranteed by the Reconstruction Finance corporation or the federal reserve system.

It happened that on almost the same day that the treasury policy was announced, one of the largest banks in the United States reported privately that one of its vice presidents had returned from a six weeks' scouting trip in an effort to find places where it could loan money. This man visited important cities in 16 states. He is a practical banker and he is thoroughly acquainted with the means of approach to potential borrowers. But his six weeks' tour netted one loan application

That bank's report may sound silly because there are so many people that need money. Yet, it must be remembered that a bank is trustee for the funds placed in its care by its depositors and it cannot hand out money with reckless abandon. It must feel reasonably sure that there will be a repayment, and this was the thing which the bank's vice president failed to find. There were plenty of individuals and corporations that needed money but they had no security to offer and little to guarantee that they could repay the borrowed funds.

Financial experts, therefore, are not unduly excited about the latest treasury ruling which was released with much gusto and with statements that this will free "many hundreds of millions" to business. I am told that the banks are chock-full of loose cash. Reports to the treasury certainly indicate that to be a fact. But when borrowers who need money have no security and when business is at such a low ebb that only the minimum of funds is needed, I believe it can hardly be said that the bankers are wholly to blame. The bankers have been vigorously criticized in the last four or five years and obviously a considerable spanking was due them. On the other hand, I think it is a plain statement of fact that you can no more force people to borrow than you can make a horse drink after you have led him to the trough.

• • •

Unusual Speaking Tour

Senator Gerald P. Nye, North Dakota Progressive Republican, has started on a speaking tour that, as far as I can find, is without precedent. The senator is chairman of the special senate committee named to investigate the munitions, aircraft, and shipbuilding industries, to determine whether these businesses have been active in fomenting trouble between the nations of the world. The committee has held hearings covering a period of three weeks, and the hearings will be resumed later with the prospect that they may run on for many months.

Senator Nye is making a series of six speeches in the United States and one in Canada, dealing with the question of who really starts wars. He has announced that he desires to tell the country how nations are driven into conflict and the inference is, of course, that he believes munition makers and others producing material for war are at the bottom of the heap.

But the point is that Mr. Nye personally is an advocate of government ownership of all plants now engaged in the production of anything used in wars between nations. He is authentically reported to have a draft of legislation in mind which he will present to the forthcoming congress. He is not alone in holding this belief for at least four other members of his committee entertain the same general trend of mind. There are seven members of the committee so that it is apparent the Nye plan will have a majority of that committee supporting it if and when it is presented to the senate.

I have examined records rather comprehensively in an effort to discover whether ever before any senator or member of the house had gone out to the country with an appeal for support of legislation under a circumstance such as this. The committee has three or four months more of investigation ostensibly to ascertain all pertinent facts. Despite the fact that the senate has voted money for the committee to make this investigation and the money will be spent at hearings, Senator Nye has proceeded to make known his views in advance.

Disclosures made by the committee thus far have been accepted generally, I think, as showing there was some fire as the cause of the smoke. Certain testimony given before that committee linked some of the American munitions makers with foreign interests whose designs were of a political character. It was shown how some of the foreign agents had attempted to provoke trouble between nations of Europe and the logical assumption is that if such activities occurred in two or three instances, they must have occurred in many others. Nevertheless, there is a considerable amount of criticism heard in Washington about Senator Nye's plan of action because, it is contended by these critics, it is hard to see how the senator can conduct an unbiased investigation after having committed himself in this unequivocable way.

ANOTHER COUNTY HEARD FROM

SAN BENITO COUNTY COURTHOUSE AT HOLLISTER

The courthouse shown above, built in 1887, is where San Benito county government transacts its business. This county, self styled the "Debutante" because it is one of the youngest counties, being the 51st of California's 58 to be founded, is located 100 miles south of San Francisco and just east of Monterey. It comprises an area about 20 miles wide and 70 miles long.

The county name is derived from a small river, christened San Benedicto by Crespi during his expedition of 1772. Five years after Crespi's visit the Mission San Bautista in the San Juan valley was built. It is the largest of the California missions. In 1864 John C. Fremont raised the American flag on what is now Fremont Peak, a state park in the county and the first place where the Stars and Stripes were raised in California.

In 1872 the county of San Benito was founded, with the town of Hollister as its capital. Since that time the county has developed farming, cattle raising, fruit growing, and its oil, granite and quicksilver resources.

Its many rolling hills and valleys have given farmers a great variety of soils on which many kinds of agricultural products can be raised. One of the county's most interesting topographical features is the Pinnacles National Monument, a series of needle-like spires of rock which jut 600 to 1000 feet above valley floors. Series of caves have been formed in these rocks, creating one of the few remaining nesting places of the rare California condor.

Sports

Coach Slip Madigan of St. Mary's will need to wear his good luck Notre Dame sweater when his galloping cohorts bump into Clipper Smith's Santa Clara Broncs on November 18. Although the game is scheduled for the Sabbath, it promises to be no Sunday school picnic, both teams being classed with the best on the coast. The Gaels, usually favorites in the Little Big Game, will enter this contest as the underdogs. So far, they have enjoyed one defeat, while the Broncs have not lost a game. In the first game of the season Santa Clara was tied by Stanford, 7 all, and since that time have crushed foe after foe. Their latest victim was the decrepit Bears from Berkeley, who after a tough battle with Washington, folded up under the Bronc attack led by old man Frank Sobrero.

It looks as if this game will be a test between a passing and a running attack. Because of an efficient line, good blocking backs and the sprinting of Sobrero, Santa Clara will probably try for points around the ends and through the line Vying with this offense will be Harry "the horse" Mattos, who is the big gun in the Gael bullet-pass attack. Each team has been perfecting a defense against the rival's touchdown tactics. As to who will win—the only safe bet is that it will be anybody's game until the final gun.

While Kezar stadium at San Francisco is offering the free-lance affair between Santa Clara and St. Mary's, the husky Loyola eleven will be entertaining the dynamic Dons from the University of San Francisco at Los Angeles. Although U. S. F. has more defeats to its discredit than the Lions, the teams are evenly matched. One way of comparing shows that Loyola held Santa Clara to nine points while the Dons held them to six points. As a comparison of teams, Berkeley was was squelched 20 to 0 by the Broncs. This game will be as tough as the northern tilt.

The two Coast conference games of the week include Idaho's invasion of the University of California's lair and the University of Oregon's trip south to meet the Trojans. The Bears should take the boys from the desert, while the Trojans will have a hard time defending their battered honor against the northwoodsmen. A rough and ready non-conference tilt between the Red Terrors from the farm and the battle-scarred veterans of the Olympic Club will be held at Palo Alto.

Reports from the East are beginning to drift in concerning possible all-American candidates. Three gentlemen from the coast are being mentioned. Two are from Stanford and one, believe it or not, is from the Trojan squad. As expected, Bobby Grayson, Stanford's line-plunging fullback and leading coast scorer, is among the boys being given serious consideration. The other Indian is versatile Monk Moscrip, the end with the educated toe. Eastern sports writers, taking into consideration his lack of support, will give Cotton Warburton a chance. Before the season is over, two more Stanford boys will no doubt be considered, Bones Hamilton and Wes Muller. These two gentlemen are good.

News Oddities

Pasadena — Did Upton Sinclair carry his own precinct? He did not. Final tally showed that he got 147 votes and Merriam received exactly 147 votes.

Albuquerque, N. M. — Stumping for his friend, Clyde Tingley, cost Douglas Fairbanks his vote. He talked a little too long and missed his plane to Los Angeles.

Sacramento — One Sacramento county voter didn't want any of the candidates for governor of California whose names appeared on the ballot. So he wrote in the name of Will Rogers and voted for him.

Redding — Some of the Shasta county proposals were decided by the absent votes which were cast. The total number of absent ballots, unusutlly large at this election, was 363.

Santa Rosa—Without the assistance of cane, friends or spectacles, Mrs. Louise M. Trowbridge stepped into a polling booth here and voted. She is over 100 years old. She declared that she hasn't missed a single election since women were given the right to vote.

Los Angeles — Upton Sinclair is asserted to have told reporters at Los Angeles that he may go on a vaudeville tour in the interest of spreading his EPIC doctrine throughout the nation.

San Francisco — Confusion over election day nearly cost E. R. Morse a term in jail. After voting, he went to court to serve on a jury. Upon arrival he found himself a day late. After his explanation of putting duty and election together, he was pardoned.

California Names
Their History & Meaning

By THOMAS P. BROWN

LOYOLA (Santa Clara County)—Loi-**oh**-lah . . . Ignatius Loyola, born in the Basque provinces of Spain, founded the Order of the Jesuits and was canonized by Gregory XV in 1622.

MANTECA (San Joaquin County)—Mahn-**tay**-cah . . . Lard.

MANZANITA (Butte and Marin Counties)—Mahn-zahn-**nee**-tah . . . Little apple, diminutive of manzana (mahn-**zahn**-nah). This shrub, so characteristic of California mountains, has berries from which the Indians used to make a cider.

MARE ISLAND (Solano County)—Originally named by General Vallejo, 'La Isla de la Yegua" (lah **Ees**-lah day lah **Yay**-gwah) The Island of the Mare, to commemorize the recovery of a much-prized old white mare. The mare, with other animals, principally horses, was being transported by rude ferry-boat from Martinez to Benicia, when the boats was capsized in a squall. The mare succeeded in swimming to the island.

MARIN (County)—Mah-**rinn** . . . Spanish pronunciation is Mah-**reen** . . . From El Marinero (Ayl Mah-ree-**nay**-roh) the sailor. A San Francisco exploring party had a desperate fight with the Licatiut tribe in Petaluma and captured its chief. He was subsequently converted to Christianity and did such good service in navigating the bay waters that he was called "El Marinero."

MARICOPA (Kern County)—Mah-ree-**coh**-pah . . . An Arizona tribal name said to mean "bean people."

MARIPOSA (County) — Mah-ree-**poh**-sah . . . The butterfly. Padre Munoz, who accompanied the Gabriel Moraga expedition in 1806 into the Sierra, wrote in his diary they found a great multitude of butterflies in this section.

POULTRY FACTS

FOWLS LOSE HEALTH WHEN PUSHED HARD

Vitality of the Birds Must Have Consideration.

By R. S. Dearstyne, North Carolina State College Poultry Department.
WNU Service.

The evolution of the fowl from a jungle bird laying 15 eggs a year to the modern hen laying up to 300 eggs in the same period is a monument to poultry science.

The fowl has been transformed from a partially herbivorous bird to one which will utilize large quantities of animal protein in egg manufacture. The birds' bodies have probably changed in adapting themselves to the new diet.

Unfortunately, however, the tendency of the industry has been to stress increased production without taking sufficient consideration of fowl vitality.

The question of mortality is now a major concern of the industry and much thought and investigation must be spent before the problem can be solved. The problem is complex, as there are so many reasons for birds dying early.

A recent study of the causes of death in 4,440 fowls showed deaths were caused by the following conditions in the percentages listed: Diseases of the digestive tract, 15.9 per cent; intestinal parasites, 11.6 per cent; respiratory diseases, 9 per cent; tumors, 8.4 per cent; germ borne diseases, 7 per cent; diseases of the glandular organs, 6.9 per cent; constitutional diseases, 6.5 per cent; abdominal diseases, 5.4 per cent; protozoan diseases, 5.4 per cent; nervous diseases, 4 per cent; accidental deaths, 3.6 per cent; diseases of the circulatory system, 1.3 per cent, and cutaneous diseases, .5 per cent.

This study brought out the fact that much of the work of reducing mortality will fall upon the individual poultryman to use better methods of flock management and of controlling the spread of disease.

Easy to Induce Turkey Hens to Use Box Nests

Make laying coops for turkey hens with no bottom so the nest will get the moisture from the ground. Make the dimensions 4 by 4 feet and high enough with a one-slope roof, advises a writer in the Indiana Farmer's Guide. The entrance should be 14 by 14 inches. The four sides are made of building lath and nailed on just like a wall to be plastered.

Locate the coops about 100 yards from your residence in a circle some distance apart. The hens watching others, especially on bad days, will learn to use these coops. This being about far enough away so the chicken hens will not disturb the nesting by scratching it out of place. After forming a trashy nest, place a nest egg, as a turkey hen likes the looks of an egg before she sits on the nest even the first time.

The openings in the coop are very important as peep holes, as the turkey hens always keep a sharp lookout when on the nest, and will not go into a dark place to make their nest.

Limber Neck in Chickens

Limber neck among chickens is a condition caused by poisoning, which is characterized by a paralysis of the neck which makes it impossible for the chicken to raise its head from the ground. It is usually associated with putrid or spoiled meat in which poison producing organisms are growing, or of fly maggots which have bred on such material. Treatment for this ailment is rather unsatisfactory, but three or four teaspoonfuls of castor oil, if given during the early stages, is recommended. Limber neck occurs frequently on farms during summer when dead chickens or animals are overlooked by members of the farm family and decomposition sets in. Dead animals and birds should not be buried, unless buried very deep, for maggots work their way to the top of the ground and chickens will eat them and get limber neck.

IN THE POULTRY YARD

Pullets that start laying before they are housed nearly always stop when they are moved.

• • •

Poultry give off a greater relative quantity of moisture than almost any other animal.

• • •

Eggs with a deep yellow yolk generally have more food value than those with a pale yolk.

• • •

It is best for the beginner not to cull too heavily, and not discard a hen on one point, but rather on a combination of points.

• • •

It is a mistake to keep growing stock of different ages in the same yard or pen, as the older birds will harass the younger ones.

• • •

Yellow corn is much more valuable for scratch feed than white corn. It contains vitamin A which is so necessary for poultry growth.

VOLCANOES IN ACTION

The volcanoes which erupted recently in the state of Vera Cruz, Mex., and in Alaska, are in that belt of volcanic activity which engirdles intermittently the huge basin of the Pacific ocean. This ring of volcanoes may be traced, on this side of the Pacific, from Cape Horn to Alaska, while on the other sides the cones are found in Japan, the East Indies, New Zealand, and other islands.

In South America, the Andes are studded with volcanoes, some of which are among the loftiest in the world. In April, 1932, a number of volcanoes roared into activity, terrifying inhabitants for 400 miles and sending dust as far away as New Zealand, 6,000 miles distant. Descabezado, Chico and Planchon in the Andes erupted again in July, and last January Llaima, in southern Chile, poured smoke six miles in the air.

Queen's Rare China

One of the smartest apartments at Buckingham palace, London, which is sometimes shown by the queen for her friends, is the china room, where the walls are lined with plates, dishes, cups and saucers from the many rare and antique porcelain services in the possession of the king and queen. These are arranged in panel formation in cases which can be unlocked for periodical washing. The value of this china is so great that the experts are locked in the china room when washing the pieces. —Philadelphia Enquirer.

If you tire *easily*—

why not reason out the cause of this unnatural condition?

Your first thought may be, "I must eat more." That's not all. You should enjoy what you do eat. Frequently, the blood cells are low... and this, perhaps, is what makes you feel weak. If this is your trouble the stomach may not be calling for sufficient food. Zest to eat may be lacking. But what a difference S.S.S. makes when taken just before meals. Just try it and notice how your appetite and digestion improve.

S.S.S. stimulates the flow of gastric juices and also supplies the precious mineral elements so necessary in blood-cell and hemo-glo-bin up-building. Do try it. It may be the rainbow you need to brush away present discouragement over your health condition.

Do not be blinded by the efforts of a few unethical dealers who may suggest substitutes. You have a right to insist that S.S.S. be supplied you on request. Its long years of preference is your guarantee of satisfaction.

S.S.S. the world's great blood medicine

Adirondack State Park

The Adirondack State park comprises a vast area of 7,200 square miles of pine-clothed mountains cradling more than 2,000 lakes. Of the 7,200 square miles, more than half is the property of the state of New York and is set aside for the public's use in very much the same manner as the federal government maintains other national parks.

Hallowe'en Devils

YOU should have a touch of the Devil in your dishes on Hallowe'en when imps and hobgoblins are supposed to be abroad. In fact, the safest thing to do with them is to eat them. So here are some recipes to show you how, which you will find, incidentally, devilishly good.

Red Hot Devils: Mix well together the contents of a 3½-ounce can of lobster spread, three tablespoons mayonnaise and two tablespoons chopped sweet pickle. Split open small, hot baking powder biscuits and butter them. Spread with the mixture, and lay over a bit of lettuce. Put on tops of biscuits and serve while hot.

Hot Devil Sandwiches: Spread the contents of a 4½-ounce can deviled ham between slices of buttered bread cut in any desired shape. Toast on both sides and pour over the following sauce.

Make a white sauce of two tablespoons butter, two tablespoons flour and one cup milk. Heat one can tomato soup to boiling, add a few grains of soda, and pour the hot soup slowly into the hot white sauce, stirring constantly. Season to taste with salt and pepper and garnish the sandwiches with fans of pickles, watercress and ripe olives.

A Drink and Dessert

Devil's Brew: Melt two squares chocolate in double boiler. Smooth two teaspoons cornstarch with two tablespoons cold water, add one-half cup sugar and a few grains cinnamon, and add to melted chocolate. Add two cups hot, strong coffee, and cook until creamy, stirring constantly. Then cover and cook ten minutes. Chill. Add two and a half cups chilled evaporated milk, and serve in tall glasses with a dab of whipped cream on top.

And how about Devil's food cup cakes as a dessert?*

YOU KNOW ME, AL — He's Got Spirit All Right — By RING LARDNER

A Heartfelt Thanksgiving

THE tradition of days of Thanksgiving in this country has been that they were appointed out of gratitude for perils overcome and dangers averted rather than as thanks for a season of bounteous crops. There was only a meagre harvest in 1621 when Governor Bradford appointed the first American day of Thanksgiving, but he appointed it nevertheless.

Since 1864, our Presidents have proclaimed annually the last Thursday in November as a day of national thanksgiving. That day falls this year on November twenty-ninth.

A Good Year to Celebrate

If we adhere to the original reason for thanksgivings, this year with its strikes, actual and threatened, its disastrous drought, its threats of war, its need of millions for relief of the poor and its widespread business stagnation is a mighty good year to celebrate.

But, if you want to hear real thanksgiving as well as celebrate it, pack up every morsel of food you have left after dinner in baskets, and start out to look for someone who needs it. If you don't know anyone yourself, your local relief organization can give you the names of any number of people who will appreciate such a call.

It's a good plan, too, when you do this, to ask for people who have children in the family. They will not only appreciate the tidbits you take to them but it is harder for children to miss the feeling of Thanksgiving Day than for grown-ups. They may not say very much in the way of thanks, but their mothers will, and you'll find, as you turn toward home with your empty basket, that Thanksgiving this year has given you a glowing feeling of friendship and brotherhood with all the world.

What shall you serve at this dinner to be shared with others beside your guests in this stimulating way? Here's a suggested menu to serve eight and be sure to be lavish in your ordering so that you will have plenty to share.

Harvest Fruit Cup
Tomato and Lima Bean Soup
Roast Duck with Celery Stuffing
Orange Sauce
Potato Croquettes
Creamed Bermuda Onions
Squash au Gratin in Ramekins
Cranberry and Apple Sauce
Chickory with French Dressing
Indian Nut Pudding
Stem Raisins *Coffee*
Mints

And here are tested recipes for some of the dishes with which you may not be familiar.

Don't These Sound Good?

Harvest Fruit Cup: Choose red-skinned apples, and dice two-thirds of a cup of them, leaving the skin on. Add one cup halved, seeded white grapes and two-thirds cup diced sliced canned pineapple, pour over one cup sweet cider and one cup pineapple syrup, and serve in glass cups very cold.

Tomato and Lima Bean Soup: To the contents of a No. 3 can of tomatoes add one and a half cups brown stock, the liquor from a No. 1 can lima beans, sixteen peppercorns, eight allspice berries, one bay leaf, one slice onion and half a teaspoon celery seed. Simmer twenty minutes, then add three tablespoons butter which has been browned, then three tablespoons flour added and browned again. Stir well, then press all through a sieve. Add one-half teaspoon Worcestershire sauce and more salt if necessary. Add the lima beans, and serve in cups with a few beans in each.

Squash au Gratin in Ramekins: To three cups canned squash add three tablespoons melted butter and two well-beaten eggs, one and a half teaspoons salt and one-eighth teaspoon pepper. Put into small, buttered ramekins. Melt two tablespoons butter, add one-half cup crumbs and mix thoroughly, add one-fourth cup grated cheese and sprinkle this mixture over the top. Brown in a moderate oven, 375 degrees.

Cranberry-Apple Sauce: Mix together in a sauce pan the contents of a No. 2 can of cranberry sauce and one cup of apple sauce (fresh or canned) and cook rapidly for a few minutes. Press through a strainer, if desired, cool and pour into a serving dish to chill.*

Kiwanis Notes

A series of golf, bridge, and baseball tourneys saw their culmination Thursday evening when the losers, Los Gatos Kiwanians, entertained the Campbell club at a dinner at the Valley Farm House near Austin corners. They made a "ladies' night" out of it, members of both clubs being accompanied by their wives.

Toastmaster Prentiss Brown, Los Gatos high school principal, carried the pleasing program through without a hitch. The host club's orchestra put on several numbers which, together with community singing and travel pictures projected by a representative of the Southern Pacific company, comprised the entertainment.

Wedding Waits New Moon

Women in Esthonia always set the wedding for a time when the moon is new because a superstition says that the bride married under a crescent moon will never grow old.

Cheaters on Guard

"A cheatin' man," said Uncle Eben, "gets kind o' lonesome and nervous 'cause he never kin tell when some of his playmates is goin' to learn all his tricks and think up some new ones."

Favored Wine

The ancient Roman government saw to it the price of wine should be so small as to allow the poorest to indulge in it.

SORE MUSCLES
